

ALEX FAST DRY®

Acrylic Latex Caulk Plus Silicone

Performance Enhancements

DAP® ALEX FAST DRY® has been improved for enhanced performance and faster paintability! Now paintable in 20 minutes with supreme performance in painting applications. Compared to leading competitive fast dry caulks, DAP® ALEX FAST DRY® has best-in-class resistance to cracking, shrinking and paint 'shiners'.¹

SPRAY PAINT IMMEDIATELY

Professional Painter Formula

IMPROVED PAINTABILITY IN JUST 20 MINUTES!

DAP® ALEX FAST DRY®

✓ *Excellent crack & shrink resistance*

✓ *No paint 'shiners'*

LEADING COMPETITIVE FAST DRY CAULK

✗ *Significant paint cracking & shrinkage*

✗ *Glossiness from paint 'shiners'*

1 – DAP internal testing in accordance to ASTM / ISO standards

2 – DAP Internal Test Method TCTM-073 for early paintability: Prepare fillet bead (10 mm x 10 mm) on inside corner of trim. Brush apply paint 20 minutes after sealant is applied. Observe for sealant deformation, paint wetting, inconsistent shrinkage, paint crawling, paint cracking, and other aesthetic issues.

3 – DAP Internal test method: Sealants applied and cured on aluminum. Paint brush applied over entire specimen and allowed to cure. Samples exposed for 7 days at 50°C and measured for gloss differences against a control on aluminum. Gloss measured at 60° angle using a Rhopoint NovoGloss meter.
