All materials used in the manufacture of the above product are compliant with the European Union Directive 2002/95/EC for the Restriction of the use of certain Hazardous Substances in Electrical and Electronic Equipment (RoHS). No Lead (Pb), Cadmium (Cd), Mercury (Hg), Hexavalent Chromium (Cr+6), PBB or PBDE is intentionally added to these components. Any trace impurities of these substances contained in the components are below the RoHS specified threshold level.

SECTION 4: FIRST AID MEASURES

**EYE CONTACT**
Flush eyes with large amounts of water until irritation subsides. If irritation persists, seek medical attention.

**SKIN CONTACT**
Flush with large amounts of water, use soap if necessary. Remove grossly contaminated clothing, including shoes, and launder before reuse.

**SKIN ABSORPTION**
NA

**INGESTION**
If swallowed, do not induce vomiting. Keep at rest and seek medical prompt attention.

**INHALATION**
Use proper respiratory protection and in a well-ventilated area. Remove victim from exposure and general area. Administer artificial respiration if breathing is stopped. Keep at rest and seek prompt medical attention.

SECTION 5: FIRE-FIGHTING MEASURES

**FLASH POINT**
-104°C, 169 K

**AUTOIGNITION TEMP**
540°C, 813 K

**FLAMMABLE LIMITS (% BY VOLUME)**

<tbody>
<tr>
<td>IN AIR</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>2.37%</td>
<td>9.50%</td>
</tr>
</tbody>
</table>

**EXTINGUISHING MEDIA**
Stop gas flow. Recommend use of dry chemical, CO₂ or halogenated extinguishing agent.

**SPECIAL FIRE FIGHTING PROCEDURES**
Stop the gas flow immediately before attempting to extinguish any gas fire. Allow the fire to burn itself out. If the gas source cannot be shut off immediately, all equipment and surfaces exposed to the fire should be cooled with water to prevent over-heating, flash-backs and/or explosions. Control the fire until the gas supply can be shut off. Isolate the "fuel" supply from fire. Avoid spraying water directly into storage containers due to danger of boilover. Use proper protective equipment and fresh air respirators when exposure to hazardous concentrations of toxic gases is possible.

**UNUSUAL FIRE & EXPLOSION HAZARDS**
Product releases flammable vapors at well below ambient temperatures and readily forms flammable mixtures with air and will burn in the open and can be explosive in confined spaces. Product vapors are invisible and heavier than air and may travel long distances to points of ignition. Alkane/chlorine gas mixtures have produced explosions.
### SECTION 6: ACCIDENTAL RELEASE MEASURES

**Actions to Take for Leak or Spills**

Spills should be absorbed or scraped up. Avoid water contamination.

**Waste Disposal Method**

Empty depressurized containers cannot be reused. Cans which are pressurized or contain liquid must be disposed in a permitted waste management facility. Disposal must be in accordance with applicable federal, state, and local regulations. Incineration equipment should be capable of handling large volumes of dense black smoke and withstand the corrosive effects of acid cases. These materials are not considered hazardous waste under Title 40, CFR Part 261 (Hazardous Wastes under the Conservation Recovery Act), Reference Sections 261.31, .32, .33(E) and .33(F). They do not have the characteristics of a hazardous material as defined under Sections 261.21, .22, .23, and .24.

### SECTION 7: HANDLING AND STORAGE

**Special Precautions**

Do not use pressure to empty container or explosion may result. Do not store at temperatures above 120°F. Odor is not an adequate warning of potentially hazardous concentrations in air. Release of these gases may cause a flammable atmosphere with explosion potential. When utilizing pressurized containers follow standard safety practices for handling aerosols.

### SECTION 8: EXPOSURE CONTROLS PERSONAL PROTECTION

**Respiratory Protection**

Health studies have shown hydrocarbons pose potential human health risks for some people. As a precaution, exposure to liquids, vapors and fumes should be minimized. Wear NIOSH/MSHA approved respirators whenever concentration in air may exceed limits.

**Eye Protection**

Wear safety glasses with side shields or chemical goggles.

**Skin Protection**

Wear long sleeves and chemical resistant gloves-polyfluorinated polyethylene has been suggested.

**Other Clothing**

Standard work clothing. Wash and dry contaminated clothing before reuse.

**Other Equipment**

Use adequate level exhaust ventilation. Where carbon monoxide may be generated, special ventilation may be required. Local exhaust recommended when appropriate to control exposure.

### SECTION 10: STABILITY AND REACTIVITY

**Stability**

Stable

**Incompatibility (Materials to Avoid)**

MAY REACT WITH STRONG OXIDIZING AGENTS

**Hazardous Combustion or Decomp Products**

DECOMPOSITION MAY PRODUCE CARBON MONOXIDE

**Conditions to Avoid**

Do not weld, heat or drill container (can). Residue may ignite with explosive violence if heated sufficiently. Spills on surfaces may cause a slippery surface.
# Safety Data Sheet (SDS)

**Product Name**: RZ-50 Aerosol Spray Lubricant

**Product Part No.**: RZ 50

**Product Desc.**: PTFE Polymer Dry Film Aerosol Lubricant

**Product Class**: LUBRICANT

**C.A.S. Number**: 0

**SDS Number**: RZ-50

**SDS Date**: 2/18/2015
