Your Next Water Heater

How to Choose

1. Know Your Fuel Type
   People typically keep the same fuel type. But consider switching to a Rheem® Induced Draft Water Heater for higher efficiency or a Rheem Induced Draft Water Heater for more hot water in a smaller size.

2. Think About Your Household Size
   Most homeowners choose the same gallon capacity they currently have. If you have space and want more hot water, choose a larger gallon capacity.

3. Choose Your Features
   For lower maintenance, consider a Performance Plus® water heater. If you need smart-home features, look to Performance Platinum®.

4. Consider Your Space
   Water heaters vary by size. Look for one that will fit your available space. If space is really a concern, consider a Tankless Water Heater.

Why Rheem?

Over our history we’ve continued to build upon our foundation of traditional tank-type water heaters to offer some of the most efficient and high-performing water heaters available today.

Our collection of Performance® Series tank-type water heaters offers the perfect balance of value, performance and features for every lifestyle and budget. We are certain you will be satisfied with whichever Rheem® Tank-type Water Heater you choose for your family’s hot water needs.
Your Next Water Heater
How to Choose

Worth It

1. Know Your Needs
2. Look for one that will fit your household size
