TIGHTENING SCREW

6 Disassemble side rod.

INNER ROD   OUTER ROD

**7** Slide curtains and curtain rings onto outer rod (large diameter rod). Slide ring support bracket on inner rod (smaller diameter rod).

OUTER ROD

8 Screw-on end bracket to the end of outer rod (larger diameter rod) by turning the end bracket.
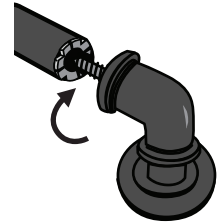

9 Screw-on the inner rod (smaller diameter rod) to rod connector which has been assembled on center rod by turning rod.

CENTER ROD   INNER ROD OF SIDE ROD
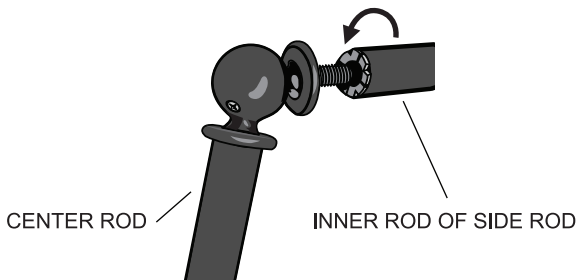

10 Assemble the rod by sliding the outer rod (larger diameter rod) over the inner rod (smaller diameter rod) with end bracket, curtain, and curtain rings. Adjust ring bracket and curtain to desired position. Lock end curtains in place using end bracket.

CENTER ROD

LOCKS CURTAIN IN PLACE
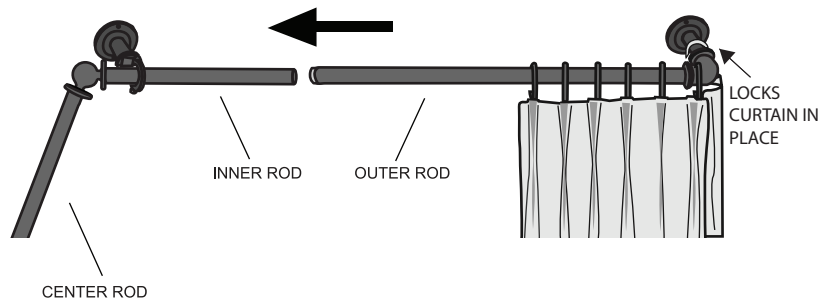

11 Insert screws through the ring supports and end bracket, then tighten screws until brackets are locked in place.
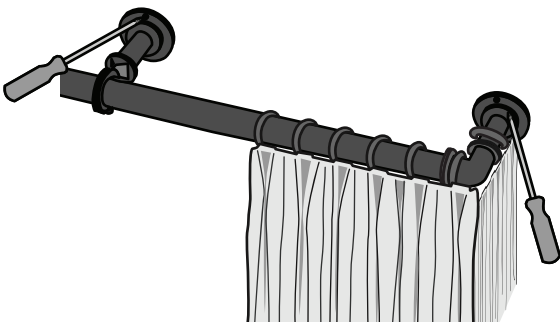

12 Repeat step 6－11 for the other side rod.

13 Tighten screws on all center supports.

DRYWALL ANCHOR INSTALLATION

If screws are going directly into wood trim or wall studs - drill 1/8" (3mm) holes and install screws through bracket.
If screws are going into hollow wall - drill 3/16" (5mm) holes and push or lightly hammer plastic anchors into holes.
Then install screws through brackets. Do not tighten screws too much - just snug is best.
