SERVICE AND MAINTENANCE

Troubleshooting

A WARNING

Before performing any type of maintenance/service, disengage all controls and stop the engine. Wait until all moving parts have come to a complete stop. Disconnect spark plug wire and ground it against the engine to prevent unintended starting. Always wear safety glasses during operation or while performing any adjustments or repairs.

THIS SECTION ADDRESSES MINOR SERVICE ISSUES. TO LOCATE THE NEAREST AUTHORIZED SERVICE CENTER CONSULT THE SEPARATE SUPPLEMENT SHEET FOR CONTACT INFORMATION.

PROBLEM	CAUSE	REMEDY
Engine fails to start	 PTO/Blade Engage knob engaged. Park brake not engaged. Spark plug wire disconnected. Throttle control lever not in correct starting position. Fuel tank empty, or stale fuel. Blocked fuel line. Faulty spark plug. Engine flooded. 	 Place knob in disengaged (OFF) position. Engage park brake. Connect wire to spark plug. Place Throttle lever to FAST position. Fill tank with clean, fresh (less than 30 days old) gasoline. Replace fuel line. See a qualified service dealer. Replace fuel filter. See the Service and Maintenance section. Clean, adjust gap or replace plug. Crank engine with throttle in FAST position.
Engine runs erratically	 Fuse(s) blown. Tractor running with choke activated. Spark plug wires loose. Blocked fuel line or stale fuel. Vent in gas cap plugged. Water or dirt in fuel system. Dirty air cleaner. 	 Replace fuse. Check that the electric choke is working. See a qualified service dealer. Connect and tighten spark plug wires. Replace fuel line. See a qualified service dealer. Fill tank with clean, fresh gasoline and replace fuel filter. See the Service and Maintenance section. Clear vent or replace cap if damaged. Drain fuel tank. Refill with clean, fresh gasoline. See the Service and Maintenance section. Clean or replace air cleaner paper element or clean foam pre-cleaner.
Engine overheats	Engine oil level low. Air flow restricted.	 Fill engine with proper amount and type of oil. Clean grass clippings and debris from around the engine's cooling fins and housing.
Engine hesitates at high RPMs	1. Spark plug gap set too close.	1. Remove spark plug and adjust gap.
Engine idles poorly	Fouled spark plug. Dirty air cleaner.	 Replace spark plug and adjust gap. Clean or replace air cleaner element and/or clean pre-cleaner.
Excessive vibration	Cutting blades loose or unbalanced. Damaged, dull or bent cutting blade.	 Tighten blade and spindle. Balance blade. Replace blade.
Tractor will not mulch grass	 Engine speed too low. Wet grass. Excessively high grass. Dull blade. 	 Place Throttle control in FAST position. Do not mulch when grass is wet. Mow once at a high cutting height, then mow again at desired height or make a narrower cutting swath. Sharpen or replace blade.
Uneven cut	 Deck not leveled properly. Dull blade. Uneven tire pressure. 	 Perform side-to-side deck adjustment. Sharpen or replace blade. Check tire pressure in all four tires.
