

Environmentally Friendly

Our products fight deforestation and reduce landfill space by using post consumer HDPE, such as a plastic milk jug, to create our site furnishings.

Vandal Resistant

Pens and markers can be removed easily. Paint does not bond to the surface. Surface cuts and scratches can be ironed or sanded away. Mounting kits provide additional security.

Maintenance Free

Our material does not need to be sealed, painted or stained and cannot rot.

UV Stabilizing Package

We infuse UV stabilizers into the material to protect against noticeable sun fading.

Solid to the Core

Our Resinwood™ lumber and molded pieces are solid all the way through with no holes or voids.

Stainless Steel Fasteners

Most of our products use high quality, stainless steel hardware.

Made in the U.S.A.

Most Frog Furnishings products are manufactured in the United States.
