

Pool & Patio Screen

The complete solution
for your enclosure

Pool & Patio Screen Types

A screening product for every job

Pool & Patio

Long lasting & durable

ADFORS Pool & Patio Screen is a heavier screening fabric specifically designed for use in large areas such as pool enclosures, screened-in patios and porches. Pool & Patio Screen has a protective UV stable coating to ensure long lasting color and flexibility. The screen will not stretch or shrink and will maintain its physical properties even under extreme temperatures.

Features and Benefits

- Stronger than standard fiberglass mesh
- Ideal for large openings and areas that need added strength
- Fiberglass screen will not rot, rust or corrode, even in salt air
- ADFORS screen is leading the industry by offering a complete line of ortho-phthalate free screen

Mesh: 18x14

100' Rolls Widths: 36", 48", 60", 72", 84", 90", 96", 102", 108"

Color: Charcoal

Pool & Patio FAQ

What other materials are needed to install Pool & Patio Screen into my enclosure system?

You will need a spline tool and flat spline.

What diameters is flat spline available in?

Pool enclosure channels are standard within this system, but are unique to typical window channels. Flat spline is offered in one standard size to fit in almost any pool enclosure.

Will these same tools work for my porch enclosure?

You will still need a spline tool and spline, however, depending on the spline channel itself, you may require a round spline with a different diameter. We recommend .140" for normal channels, but .125", .160", .175", .190", and .220" are also available.

Can I use specialty screen in my enclosure?

Absolutely. The use of specialty screens will provide you with a customized enclosure that meets all your needs.

What makes ADFORS screen safer?

ADFORS Screen is ortho-phthalate free. We have also now achieved GREENGUARD [GOLD] certification on this product, which certifies that the product has low chemical emissions.

Sizes up to
108" wide

Pool & Patio Plus, a premium hybrid pool and patio product

Increased strength & protection without compromising visibility

P3 is a unique hybrid construction that is part polyester and part fiberglass which gives increased strength and protection while at the same time maintaining excellent outward visibility. The unique construction and composition makes it easier for contractors and installers to roll in.

Features and benefits of P3 - Pool & Patio Plus Screen:

- Stronger than standard 18x14 screen
- More openness than heavy duty polyester products, allowing more light, airflow and reducing wind load on cages (51% vs 44%)

100' Roll Widths: 36", 48", 60", 72", 84", 96", 108"

Color: Charcoal

Pool & Patio Premium Polyester

For the strongest, most durable pool cage screen

The newest high performance pool and patio enclosure fabric that maintains its color, visual appearance, and structural integrity much longer than traditional fiberglass products. Produced with a denser construction, P4 still allows considerable light and air flow transmittance. Compared to other polyester products, P4 has a slightly thinner profile, offering a better handling and installation experience.

Features and benefits of P4: Pool & Patio Premium Polyester:

- Significantly stronger than traditional 18 x 14 fiberglass screen
- Heavy duty polyester construction provides durability and longevity
- Ortho-phthalate free, environment friendly coating

Mesh: 17x20 & 17x14

100' Roll Widths: 36", 48", 60", 72", 78", 84", 90", 96", 102", 108", 114", 120"

Color: Charcoal

P3: Pool & Patio Plus FAQ

What benefit does a hybrid screen product give?

P3 is manufactured with both fiberglass and polyester yarns, giving you the best characteristics both have to offer. This combination provides additional strength from the polyester yarns, while maintaining the visibility with the fiberglass yarns. Additionally, P3 is much easier to install compared to other heavy duty polyester products.

Is the P3 construction different from standard Pool & Patio Screen?

No, the construction for P3 remains 18x14. The hybrid construction keeps the screen thin for easy installation.

Do the hybrid polyester/fiberglass input fibers have an adverse reaction together when exposed to the elements?

No, after numerous state of the art weathering and durability testing, the combination of both fibers does not sag, shrink or exhibit abnormal behavior when installed properly and subject to normal environmental conditions.

What makes ADFORS screen safer?

Pool & Patio Plus (P3) is ortho-phthalate free. We have also now achieved GREENGUARD [GOLD] certification on this product, which certifies that the product has low chemical emissions.

P4: Pool & Patio Premium Polyester FAQ

Why should I choose P4 Screen?

P4: Pool & Patio Premium Polyester Screen, the premier pool and patio cage screen is a long-lasting product that can withstand debris, animals, children, and the harmful effects of the sun and elements, ensuring a long lasting screen enclosure.

How is P4 different from other polyester products?

P4 has a slightly thinner profile, offering a better handling and installation experience. Third party lab testing concluded P4 has the highest burst points than any other product on the market.

What makes ADFORS screen safer?

Pool & Patio Premium Polyester (P4) is ortho-phthalate free. We have maintained the same great aesthetics, properties and processability that our screen has always had.

Customize your enclosure

Glass Screen

Keep grass and debris out

A fiberglass screen that is laminated for use on the bottom part of an enclosure. It is normally used from the chair rail to pool and patio deck.

Features and Benefits

- Laminated to keep out grass clippings and bugs
- Provides increased privacy

100' Rolls Widths: 36", 72"

Color: Charcoal

Pet Resistant

Resists damage from household pets

Designed to resist damage from animal claws, Pet Resistant Screen is much heavier than traditional screening. Pet Resistant Screen is a smart solution for those who repeatedly have to replace screens. Our Pet Resistant Screen is the only one on the market that includes a coating to make it flame resistant by passing the ASTM requirements D3656 and D6413.

Visit www.adfors.com to see the flame tests completed using ISO11925-2 testing standards.

Features and Benefits

- Heavy duty polyester screen prevents tears and damage
- Ideal for areas where pets or children push against the screening
- Durable, yet still allows for excellent outward visibility and airflow

100' Rolls Widths: 36", 48", 60", 72", 84"

Color: Charcoal

Sun Guard

Control the damaging effects from the sun

Sun Guard can help to control the damaging effects of the sun. While filtering light and heat from the exterior, the unique weave used in Sun Guard is also specifically designed for better visibility and without distortion from the interior. Sun Guard is available in 2 different styles - Sun Guard 85 and Sun Guard 90.

Each style is tested for sun control using the ASTM D4028 standard.

Features and Benefits

- Extremely tight fiberglass weave for greater protection from sun and insects
- Light filtering for greater heat reduction and less glare
- Long-lasting, attractive exterior appearance while providing increased interior privacy

100' Rolls Widths: 36", 48", 60", 72", 84", 96"

Color: Charcoal

Small Insect

Enjoy the outdoors without the bugs

An ideal screen for protection against no-see-ums, gnats, sand flies and other tiny irritating insects. As a premium screen product, Small Insect Screen is tested using ASTM D3656 standards.

Features and Benefits

- Thicker yarn and tighter weave provides greater insect protection than standard screen
- Ideal for low marshy, coastal and wooded areas

100' Rolls Widths: 36", 48", 60", 72", 96", 108"

Color: Charcoal

Enjoy the outdoors with Saint-Gobain ADFORS premium Pool & Patio Screen, or customize your enclosure with a combination of specialty screen to achieve the ideal solution for your pool or patio.

ADFORS is leading the industry by making our full line of fiberglass and polyester screens ortho-phthalate free, ahead of industry standards.

Download the Enclosure Enhancer app on Google Play or the Apple App Store

Customers are asking for custom screening solutions

Based on numerous focus groups we've conducted, ADFORS understands that homeowners prefer to use specialty screening. Mix and match Saint-Gobain ADFORS specialty screening to create the enclosure best suited for a customer's unique needs. Use Pet Resistant screen along the bottom to keep tears at bay, or solar along the top to protect furniture from fading. There are numerous ways to combine our specialty screening to deliver the ideal custom solution to each customer.

Download our **Enclosure Enhancer** app on the Google Play or the Apple App Store or visit adfors.com to access the web version. **Enclosure Enhancer** allows you to virtually view the world through a selection of screens through the Screen Visualizer or Customize Your Enclosure which allows you to mix and match specialty screen for a virtual custom enclosure suited to your functional needs.
