

## **INSTALLATION INSTRUCTIONS**

1. Before using the refrigerator for the first time, remove all of the packing materials, including the foam base and adhesive tape holding accessories in place.
2. The refrigerator should be located on a firm, flat surface that is strong enough to support the refrigerator when it is fully loaded.
3. Choose a location that is not exposed to direct sunlight, high temperatures, heat sources such as a stove or radiator, or in a moist area. Do not choose a location where the temperature will go below 55°F as this could cause the refrigerator to not function properly.
4. Leave a minimum of ½" between each side of the appliance and the wall. The top and back of the appliance should have a minimum of 1½" clearance. This allows for proper air circulation. This appliance is intended to be free-standing and should not be built-in or placed in a recessed area.
5. The refrigerator legs must be adjusted during installation in order to function properly. The leveling legs on the front corners can be adjusted by turning clockwise to raise the appliance, and counter-clockwise to lower it. Be sure to have the appliance slope slightly backward to ensure that the door closes tightly.
