

# VLP<sup>®</sup>

## VINYL/LEATHER REPAIR

VLP is a clear, high strength, flexible adhesive, designed to mend small rips, tears and small holes on most types of vinyl & leather material. A repair made with VLP is stronger than the original vinyl or leather material. This air dry formula dries clear and blends with colored materials and is easy to use. VLP actually dissolves the surface of the vinyl creating an excellent bond.

### *Application Ideas*

- Bowling bags
- Golf bags
- Covers
- Tent Floors
- Rainwear
- Curtains
- Awnings
- Vinyl welting
- Luggage
- Garment bags
- Athletic Equipment

# PERFORMIX BRAND VLP vs. COMPETITORS

*#1 is the Performix Brand VLP, leather & vinyl repair. #2 through #9 are well known repair products that claim to dry and remain clear.*

Plasti Dip International purchased all of the clear vinyl/leather repair products that we could find on the market at the time. We applied each Brand to the same piece of vinyl and placed it in our accelerated weathering tester for approximately 460 hours = 1 year. As you can see, the competitors' turned brown, black, and became brittle. Performix Brand stayed clear and flexible.
