

# Animal & Rodent Hardware Fence Cloth

Protection Where It's Needed Most

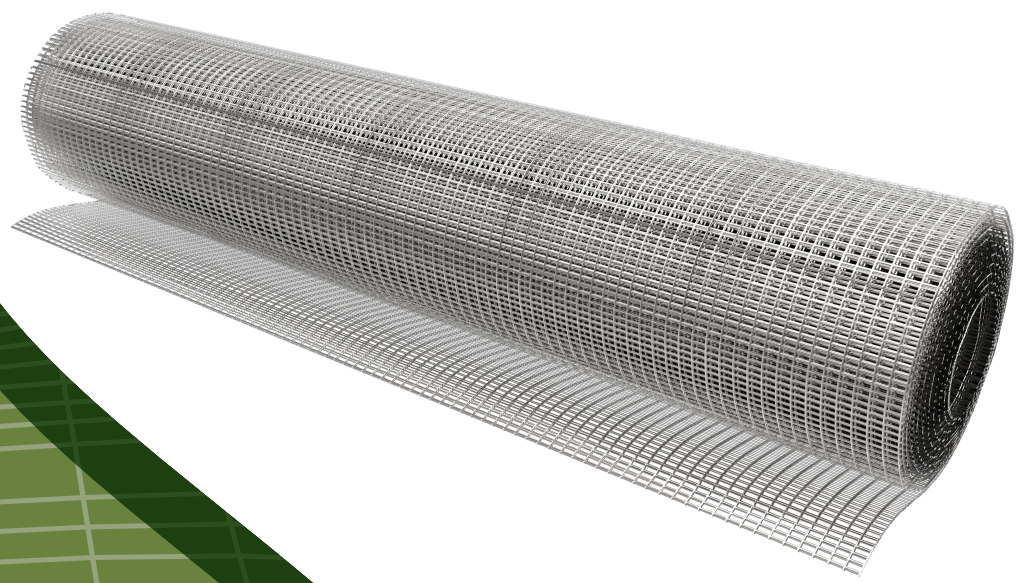

**Our hardware cloth is designed with a ½" square mesh making a very versatile product which can be used in a wide variety of applications. It is great for gutter guards, animal control, tomato cages, tree guards, gardening crafts and so much more.**

- Smaller animals need a place to feel safe and protected from larger animals. Our hardware cloth can make an excellent enclosure for your rabbits, chickens, and birds. With just a few tools, you can construct a wooden frame enclosure and wrap the wire around it. Dig around the perimeter and lay the wire down in the ground so larger animals can't dig under it. Replace the dirt and compact it.
- This wire is perfect for protecting young trees by creating a barrier circle around the tree to keep animals from eating the bark and damaging it.
- An inexpensive way to stop all those leaves from entering your gutters too! This wire when cut to size creates a barrier that doesn't allow leaves and debris to clog up your gutters!
- You can also use this underneath sod to keep rodents from digging up through it and creating dead spots in your grass!
