

TacoGenie™

SAVE ENERGY • SAVE WATER • SAVE MONEY

and a Tankless Water Heater

**Taco TacoGenie™
is the Perfect
Match.**

Combining the TacoGenie with a tankless water heater will save your customers energy dollars and preserve warranty longevity.

So if you're going tankless,
Go TacoGenie.

Enjoy the soothing convenience and
comfort of hot water

Taco®
Do your **best work.®**

If you're going tankless... Go TacoGenie™.

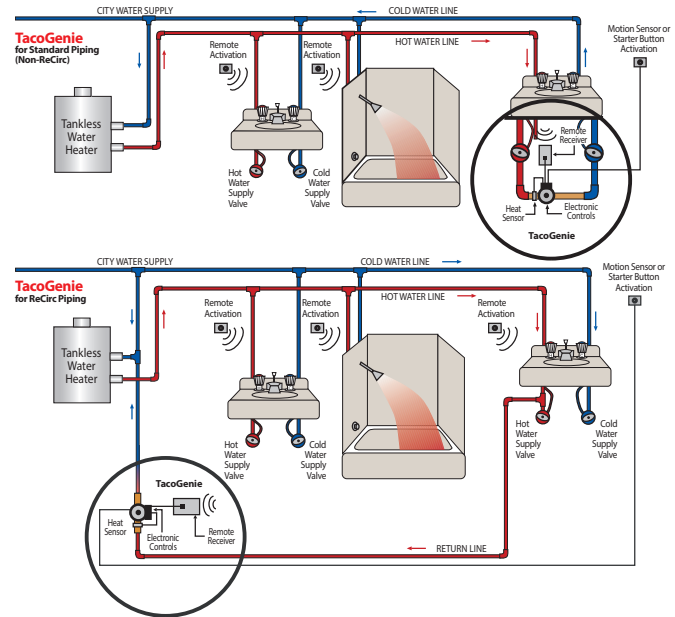

Leading tankless water heater manufacturers now recommend use of their products with a quality water recirculation system like TacoGenie. In fact, some of those manufacturers may reduce the warranty coverage period if their product is used with a conventional timer-controlled recirculation system. Conventional water recirculation systems fitted with temperature sensors and timers don't always provide hot water when you want it... that's why choosing the TacoGenie is always the right choice.

TacoGenie eliminates the need for a conventional recirculation system, and has been engineered to provide the head pressure needed to overcome the high pressure drops experienced with tankless water heaters.

TacoGenie delivers hot water by push button or motion sensing – not by temperature sensor or a timer. There are no standby losses, no stack losses and no need for extra storage tanks.

NOTE: Standard plumbing and distance requires that TacoGenie be installed between the hot and cold water line at the most distant hot water location.

Contact your local Taco wholesaler or local Taco sales representative agency.

TacoGenie Water Recirculation System					
Product Number	Connection Sizes	Motor			Ship Weight
		Voltage	RPM	HP	
008-CT	1/2" Male NPT	115/60/1	3250	1/25	10
