After all wires are connected and secured with wire connectors (D), re-install the canopy.

Wiring the receiver and fan to the ceiling

- Using the wiring tray connectors (D), connect the black wire from the receiver (A) to the black wire from the fan. Connect the blue wire from the receiver (A) to the blue wire on the fan.
- After all wires are connected and secured with wire connectors (D), re-install the canopy.

Managing the battery

- Before replacing the wall control, press the battery door to exit. Install the battery (C) with the positive side (+) towards the display. When replacing the battery, note that the wall control (B) needs the correct battery size and type.
- After installing the battery (C), press both the Fan Off button and the Light button to complete the installation. The wall control (B) is now paired to the fan’s receiver (A).
