

Wooden Furniture Cleaning and Care

Dust frequently with a clean, damp, lint-free cloth. Frequent dusting will remove abrasive buildup which can damage a finish over time.

Occasionally, use a light application of a high-quality furniture polish to enhance the beauty of the finish. Avoid using oily polishes or waxes.

Avoid exposing your furniture to direct sunlight or heat outlets. Prolonged exposure to direct sunlight can fade the finish of your furniture. Extreme temperatures and humidity changes can cause cracking and splitting.

Do not expose your furniture to any liquids. Wipe off water immediately if spilled. Alcohol, nail polish, perfumes, and other liquids may cause the finish of your furniture to dissolve so be cautious when handling liquids around your furniture.

Small accidental scratches may be touched up with a touch up pen. Please contact your local retailer for touch up kits that match your furniture.
