Safety Information

Before installing this sink, read this instruction manual carefully. It contains important information concerning the safe installation, operation, and maintenance of your sink.

Retain this manual for future use. In the event of a sale, transfer, or relocation, ensure this manual remains with the sink.

NOTICE: Avoid leaving wet sponges, salt, and corrosive substances on the sink for long periods of time. Lines and scratches may be caused by improper use of the sink.

NOTICE: Do not place the sink on its side as there is a risk of damage.

WARNING: Keep all the packaging materials out of the reach of children to prevent possible choking or suffocation.

WARNING: Use caution when installing the sink. There is a risk of crushing your fingers when inserting the sink into the installation location.

CAUTION: Never place hot objects such as hot pans on the sink. Wait until the object has cooled or use a heat resistant plate when placing hot objects on the sink surface.

Warranty

LIMITED LIFETIME WARRANTY

This limited lifetime warranty is extended to the original purchaser of this sink. The manufacturer warrants this sink to be free from all manufacturing defects in material and workmanship. The manufacturer will repair or replace, at no charge, excluding labor, any sink that is proven to be defective under normal use. An equivalent replacement will be issued to the original owner provided the defective sink was installed in accordance with the installation procedures, used and cleaned as recommended, and not damaged due to abuse, misuse, or negligence. Chips, scratches, and stains are not deemed to be manufacturing defects. The manufacturer will not be held liable for chips, scratches, and stains that can occur under normal use over a period of time. Please refer to the cleaning instructions to maintain your sink in its original appearance. The manufacturer shall not be held liable under this warranty where the sink has been used in a non-domestic application, improperly installed, or damaged from the impact caused by a heavy object being dropped on the sink of from improper handling.

The manufacturer shall not be liable for any inconvenience or expense for material or labor related to the removal or replacement of a defective sink or for any loss or damage to any person or property whatsoever resulting from the defective sink. All transportation costs to and from the point of purchase will be the responsibility of the purchaser.

Any sink returned must be in the original packaging and include all the accompanying accessories, parts, and documentation. The manufacturer reserves the right to inspect any sink reported to be defective prior to replacement of the sink.

WARRANTY EXCLUSIONS

Excluded are any accessories that accompany the sink (strainer, bottom grid, etc.). The manufacturer guarantees all sink accessories to be free from manufacturing defects for one year. The manufacturer is not responsible or liable for indirect, special, or consequential damages arising out of or in connection with the use or performance of its products and its liability under this warranty is limited to the replacement of the defective material at the location of purchase.

The original dated sales receipt must be retained by the customer and is the only acceptable proof of purchase. The manufacturer makes no additional warranties, express or implied, and any implied warranty including that of merchantability or fitness for a particular purpose is limited in its duration to the duration of the written limited warranties set forth herein.

OBLIGATION OF THE ORIGINAL OWNER

No employee, agent, or other person is authorized to provide any warranty on behalf of The Home Depot for a Glacier Bay product that is in addition to or different from the warranty stated above unless the warranty has been previously approved by an authorized representative. This warranty gives you specific legal rights and you may also have other rights which may vary from province to province.

Pre-Installation

PLANNING INSTALLATION

Compare all the parts to the Hardware Included and Package Contents lists and verify that all the parts are included. Inspect all the parts for damage. If there are missing parts or visible damage to the sink, do not install and contact the Customer Service Team at 1-855-HD-GLACIER.

TOOLS REQUIRED

- Silicone sealant
- Safety goggles
- Phillips screwdriver
- Hammer
- Jigsaw
- Drill and drill bit
- Plumber’s putty

HARDWARE INCLUDED

NOTE: Hardware is not shown to actual size.

Undermount-Installation

1 Preparing the cabinet

**NOTICE:** It is strongly suggested that you contact a professional countertop fabricator when installing the sink as an undermount.

**NOTICE:** The cabinet must be installed, secured, plumbed, and level before installing the sink.

**NOTICE:** It is recommend to provide the cabinet maker with the actual sink prior to cabinet fabrication. Before installing the sink, verify that the distance from the top of the doors to the top of the cabinet is greater than the apron front.

**NOTICE:** Double check the measurement of the cabinet cutout and make any necessary adjustments by either adding filler strips or sanding the opening.

**NOTICE:** A custom sink base cabinet and support framing is required for proper installation.

☐ Construct a support frame to fit inside the cabinet opening. Provide the appropriate clearance for the faucet, the water supply lines, the drain assembly, the garbage disposal and the structural parts of the cabinet.

☐ Apply painter’s tape to the cabinets for marking and cutting purposes. This will protect the cabinet from damage while cutting.

☐ Outline the cutout on the front of the cabinet according to the actual sink.

☐ Using a sharp saw blade, carefully cut the cabinet on the traced line.

OUTLINE FOR APRON FRONT SINK CUTOUT

2 Preparing the countertop

☐ Measure the sink apron and the cabinet opening to make sure the sink apron will fit into the cabinet opening. If necessary, sand the opening or add wood filler strips.

☐ Prepare the cabinet and create a support frame inside the cabinet that the sink will sit on. Use 2x4 solid wood studs to create the support frame. Your cabinet and support frame should be strong enough to hold up to 200 lbs of weight once installed. The support frame should be positioned so that the top of the sink rim is level and flush with the top surface of the cabinet perimeter. Make sure the support frame leaves room for the drains, the faucet water lines, and the garbage disposal (if any).

☐ Place a thin layer of sealant on the supporting frame where it will contact the sink.

☐ Due to the various cutout sizes possible (based on your preference) a cut-out template is not provided. Use the actual sink measurement to determine the actual location of the cutout. Ensure adequate clearance behind the sink for any faucet and backsplash.

☐ Trace the cut-out opening on the countertop. Cut out the opening in the countertop. Use an orbital sander or sanding block to smooth the edge of the cut-out area and remove all the saw marks. For laminate type countertops, all the exposed un laminated surfaces near the cut-out opening must be adequately finished and sealed to prevent water damage.

3 Install wood supports (Not included)

☐ Cut two lengths of support framing to extend along the inside walls on each side of the base cabinet.

☐ Measure and mark the support mounting locations; ensuring the sink rim will sit at, or slightly below the top edge of the cabinet.

☐ Position and level the supports.

☐ Secure the supports with construction adhesive and screws (not provided).

☐ Cut four lengths of support framing to extend from the bottom of the installed supports to the floor of the cabinet.

☐ Secure the vertical supports with construction adhesive and screws (not provided).

Please contact 1-855-HD-GLACIER for further assistance.
4 Installing the sink

NOTICE: The front sink apron must be secured to the front of the cabinet by attaching fasteners through the cabinet front and into the support framing. Failure of the step can lead to product damage.

NOTICE: The manufacturer is not responsible for the sink or the countertop if damaged during installation. Be sure to inspect the sink for damage prior to beginning installation.

NOTICE: Metal edges may be sharp - use caution when handling.

☐ Clean the sink apron and top rim of all debris. Ensure that the surface on the underside of the countertop cutout opening is smooth and free of debris.

☐ Lower the sink (A) onto the supports and verify the sink is supported by the frame.

☐ Push the sink in to ensure the apron is flush to the front of the cabinet.

☐ Verify the sink is level. Make any adjustments and shim as needed.

5 Installing the countertop

☐ Clean the bottom of the countertop and the top flange (or lip) of the sink with denatured alcohol.

☐ Apply a narrow bead of silicone adhesive sealant (not included) around the side and back of the sink (A).

☐ Carefully position and secure the sink to the countertop following the manufacturer's instructions.

☐ Apply a thin bead of silicone sealant (not included) where the sink meets the countertop and cabinet.

☐ Immediately remove excess sealant.

Please contact 1-855-HD-GLACIER for further assistance.
6 Installing the drain assembly

- Place the sink (A) into the installation hole to verify the fit. Adjust the cutout if necessary.
- Install the strainer assembly (C-J) as these steps describe. It is easier to install the strainer assembly (C-J) to the sink (A) before the sink is installed to the cabinet.
  1) Apply a small amount of plumber’s putty (not included) in the notch around the drain hole of the sink (A). Place the strainer ring (E) on top of the drain hole in the sink (A).
  2) Put strainer basket (C) into the strainer bowl (D) and place this assembly into the drain hole in the sink (A).
  3) From underneath the sink (A), place the paper washer (F), rubber washer (G), locknut (H), plastic joint (I), and connecting nut (J) under the drain hole in the sink (A).
  4) Tighten the locknut (H) to hold the strainer assembly securely in place.

7 Putting on the grid

- Place the bottom grid (K) into the sink (A).
- If you have a double bowl sink, install the assembly and put on the grid in the same way for the second bowl.
Undermount-Installation

8 Putting on the accessories (workstation sinks only)

☐ For workstation sinks (A), place the cutting board (N), the colander (M) and the roll mat (L) on the sink (A) or countertop directly.

Care and Maintenance

☐ Do not use abrasive cleaning creams or powders, concentrated caustic soda, formic acid, or anything highly corrosive. For more information on removing difficult stains, contact customer service at 1-855-HD-GLACIER or visit your local Home Depot store.

☐ Clean with a sponge or soft dish cloth and gentle sink soap. For stains that are difficult to remove, such as calcium deposits, use eraser sponges, vinegar-based cleaners, and lime removers.

☐ Rinse the sink with hot water and dry the sink with a soft absorbent cloth.

☐ Fruit juices, coffee, and tea can stain the surface of your sink if not removed. Rinse or wipe the sink promptly after these substances make contact with the sink.

☐ Never use steam or high-pressure cleaning systems to clean your sink.
