Cut

3  
Separate

4  
Insert

5  
Flex

70% of installed garage doors are uninsulated. *Garages are typically the largest uninsulated part of the house.*

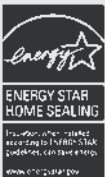

Lamination for enhanced appearance, superior durability and easy cleaning.

Made from energy efficient expanded polystyrene. Airpop® (EPS) is known for its long lasting R-Value (4.8). Reduces heating and cooling costs.

Easy installation requires only a few standard tools.

**KIT DIMENSIONS:**

- 20 1/2" wide x 54" long x 10 1/2" high
- Approximate weight: 9.5 lbs.
- Kit contains 8 panels (1 1/4" x 20" x 54")
- Fits all standard 8' and 9' single-car, metal garage doors
- Two kits required for 16' and 18' two-car garages
- 16 Kits per pallet
- 416 Kits per standard truckload
