

Ceramic Tile & Glass Products

Care & Maintenance Guide - General Guidelines

Kantu's Ceramic Tile and Decorative Glass Products retain their original beauty and luster with the proper care and maintenance. All that is necessary to keep ceramic tile and decorative glass looking as good as new is a quick wipe with a clean damp cloth or mop. Prompt cleanup of spills and regular cleaning keeps them looking their best.

Once installed, ceramic tile and decorative glass need proper care and maintenance. Following are guidelines to help your Kantu products retain their original qualities:

- ❖ It is recommended to use only liquid detergent specially manufactured to clean ceramic and glass products.
- ❖ Paste and powder-based cleaners can leave residues on the surface of the tile and grout.
- ❖ The use of a foam sponge is recommended. Sponges containing abrasive residues may scratch or dull the finish of the ceramic tile or decorative glass and therefore should be avoided.
- ❖ Cleaning solutions containing oils, fats, acids or other chemicals should be avoided.
- ❖ Follow the directions provided by the manufacturer of the cleaner to ensure proper dilution and application.
- ❖ It is recommended that cleaning solutions be tested on an isolated area, to check the results, prior to proceeding to clean the entire ceramic tile and/or decorative glass.
