

# Installation Guide

## CHOOSE YOUR FENCE STYLE.....

Whether installing preassembled panels or building with components, there is a fence style right for you. Preassembled panels make installation easier and are perfect for long runs. Components leave you with more flexibility on short runs (less than 8') and on sites that are not level.

**Solid** – Allows for complete privacy. Used to surround swimming pools, define property lines or cover unattractive areas. (See Dog Ear Privacy photo below).

**Spaced Picket** – Ideal for defining boundaries while maintaining decorative appeal. (See Spaced Picket photo below.)

**Shadowbox** – The ideal “good neighbor” fence features the same look on both sides. This style has the look of a privacy panel but allows for more air circulation. (See Shadowbox below.)
