

CARING FOR ACACIA WOOD

Acacia wood is durable and robust, making it perfect for outdoor furniture. Here are some tips on caring for your acacia wood outdoor furniture to make it last and look beautiful long term.

CLEANING INSTRUCTIONS

Wipe down the wood with a damp clean cloth or use a soft damp brush to prevent dust and pollen from accumulating.

DEEP CLEANING

For deeper cleaning to remove stains, mold, and mildew, use a mild natural soap, warm water, and a soft brush. Do not use a soap that contains ammonia or silicone. It will strip down the outer layer of the wood.

DRYING

After cleaning, allow the furniture to dry completely in the sun.

STORING AND COVERING YOUR SET

For longer lasting beauty and durability, please use outdoor furniture covers when not in use. At the end of the season, store away in a cool, dry place like a garage or basement.
