

How to choose the correct size Aluminum Roof Bar

1 Measure inside width of rack on car or SUV

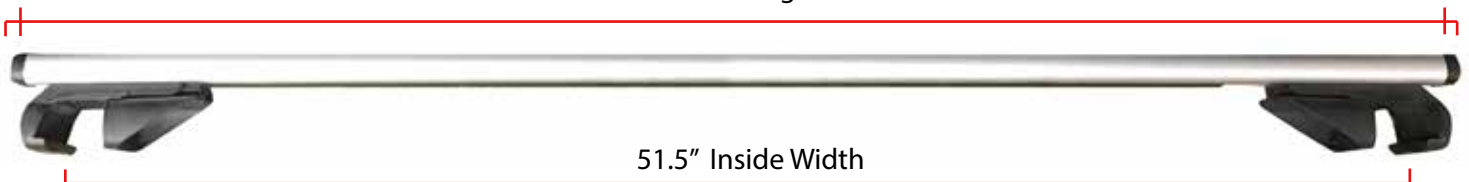

2 Measure width of rack.
It must be between 1.5" - 3"

3 If the inside width of your rack is 30" - 51.5", choose 54 in. Universal Aluminum Roof Bars
If the inside width of your rack is 30" - 46", choose 47 in. Universal Aluminum Roof Bars

*** NOTE: One set includes two identical pieces**
