MT100 42" RIDING LAWN TRACTOR

Model: MYT4213500

Important Notice: These FAQs are designed to help you get the most out of your Murray product. For detailed operating instructions and safety information specific to your model, refer to your owner's manual.

FAQ 1: Does it come assembled, or is assembly required?

Some assembly is required if delivered to your home. The MT100 arrives in a crate with the engine, deck, and frame pre-assembled. You'll need to attach the steering wheel, seat, and battery. Most customers complete assembly and are mowing within an hour. The mower comes with clear instructions, and the engine is prefilled with 10W-30 oil from the factory, so it's ready to use right away.

FAQ 2: How well does it work on hills?

The MT100 is designed for flat or moderately hilly terrain. The 6-speed manual transmission and rugged tires provide good traction on slopes typical of residential yards. The MT100 excels on properties with gentle rolling terrain and obstacles like trees and garden beds.

FAQ 3: Does it cut in reverse?

Yes! The MT100 cuts in reverse with a safety switch. This means fewer missed spots and less trimming around obstacles. The safety switch prevents accidental blade engagement for added protection. Reverse mowing speed is 2 MPH.

FAQ 4: What kind of gas does it use?

Use regular unleaded gasoline with a minimum octane rating of 87. Do not use diesel or E85 fuel. The MT100 has a translucent fuel gauge so you can easily monitor fuel levels while mowing.

FAQ 5: Does it come with a bag or mulching kit?

Side discharge is standard on the MT100. Mulching kits and rear baggers are sold separately. The MT100 is compatible with the Murray 42-inch mulching kit (MYTA-MK42) and rear bagger (MYTA-DB42), available exclusively at The Home Depot. To confirm the correct accessories for your model, contact Murray customer support at (855) 693-2582.

FAQ 6: What is the warranty?

The MT100 is backed by a 2-year limited warranty. We recommend registering your mower after purchase to ensure faster service and support. Murray's 100+ year legacy of quality means you're investing in a brand that stands behind its products. For warranty service or questions, contact Murray Support at (855) 693-2582.

FAQ 7: Can I attach a snow plow or other accessories?

Yes! The MT100 has a built-in rear hitch that can tow up to 400 lbs (trailer and load combined). It's compatible with snow plow attachments designed for 42-inch tractors, lawn rollers, utility carts, and other tow-behind accessories. This makes the MT100 useful year-round for seasonal tasks beyond mowing.

FAQ 8: Does the engine come with oil?

Yes. The MT100 engine arrives prefilled with 10W-30 oil from the factory, so it's ready to mow right out of the crate. Prior to mowing, please check to ensure that it is properly filled. For ongoing maintenance, use 10W-30 oil and follow the recommended oil change schedule in your owner's manual.

FAQ 9: Where can I get it serviced or buy replacement parts?

For service, replacement parts or technical support, contact Murray Support at (855) 693-2582. You can also find genuine Murray parts and accessories exclusively at The Home Depot. Visit your local store or shop online at HomeDepot.com for blades, belts, filters and maintenance kits.

FAQ 10: How wide is the mower? Will it fit through my gate?

The assembled width of the MT100 is 44 inches (with the side discharge chute up). The cutting deck is 42 inches wide. Measure your gate or storage area to ensure proper clearance before delivery. Most standard residential gates accommodate the MT100 with room to spare.
