This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

IMPORTANT SAFEGUARDS

WARNING: Read and understand this entire manual before operating or servicing this product. Failure to follow these warnings and instructions can cause personal injury or damage to valuable property. Avoid children using the product. And this product is not a toy. Do not allow children to play.

CORRECT DISPOSAL

This product is subject to the provision of european Directive 2012/19/EU. The symbol showing a wheelie bin crossed through indicates that the product requires separate refuse collection in the European Union. This applies to the product and all accessories marked with this symbol. Products marked as such may not be discarded with normal domestic waste, but must be taken to a collection point for recycling electrical and electronic devices.

SETUP PRECAUTIONS

To ensure safe use and avoid injury and property damage to you and others, please make sure to follow the following safety precautions.

This product does not consider the following situations:

- ☆ The use of equipment by unattended children and individuals with disabilities;
- ☆ The situation of children playing with equipment;
- ☆ This product is not suitable for individuals with physical or mental deficiencies and a lack of necessary experience and knowledge (unless

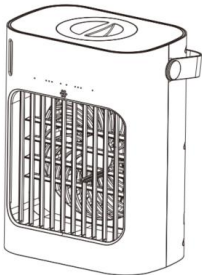

used under the supervision of someone responsible for their safety).

USAGE STEPS

- ①Put the cooling fan on the flat desk,and open the lid counterclockwise.

- ②Add 700ml water into the water tank.

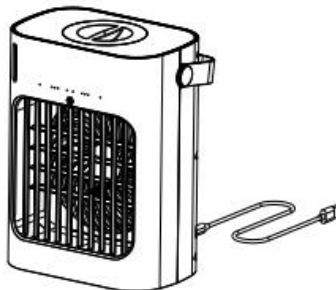

ATTENTION:

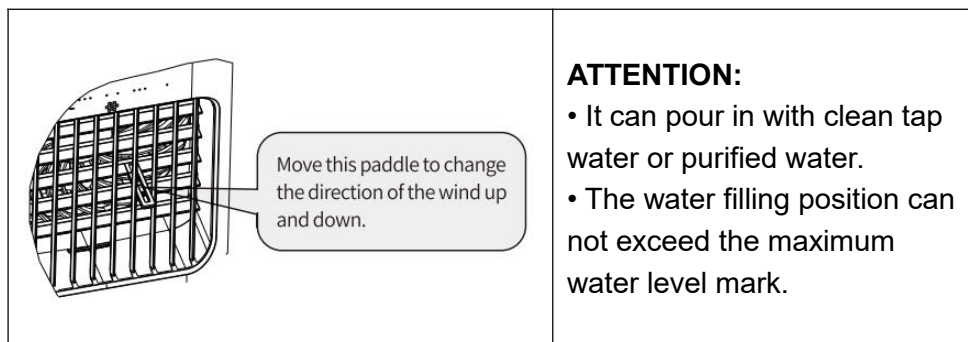

- Suggest adding purified water for use
- Aromatherapy essential oils and other substances are prohibited from being placed in the water tank

③ Pay attention to the maximum water level that can not be exceeded when adding water. Install the lid and tighten it clockwise.

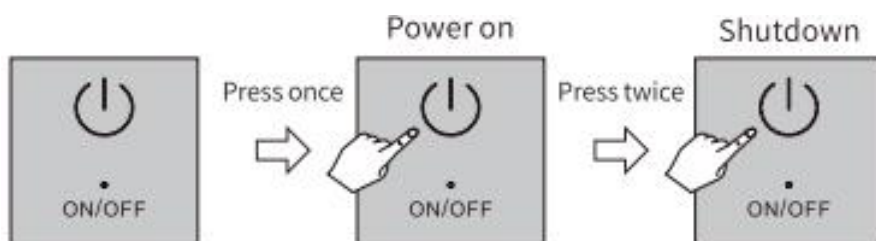

④ Plug in the power cord and press the power button to start working. Use a mobile phone charger to power up.

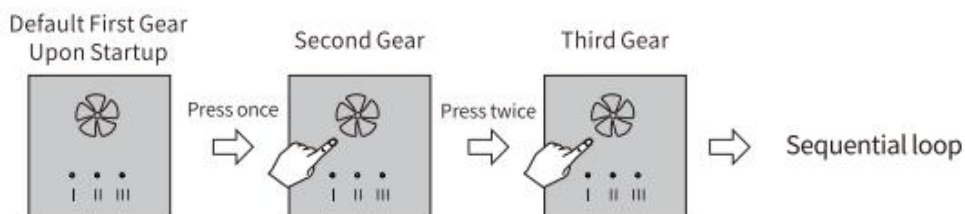

OPERATION STEPS

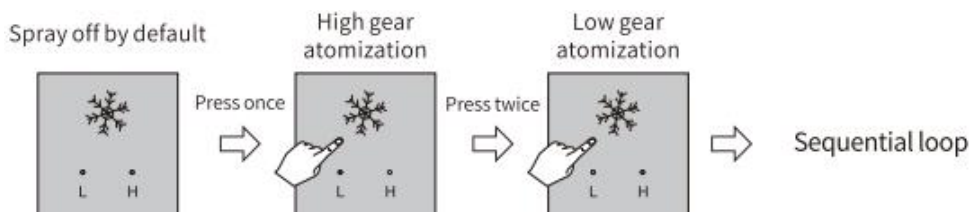

1. Press the power button once to turn on and then press it again to turn off. The default wind speed is set to work when starting up;

2. Press the wind speed button repeatedly, switch between 1st gear, 2nd gear, and 3rd gear for wind speed, cycle in sequence, and default to when turning on.

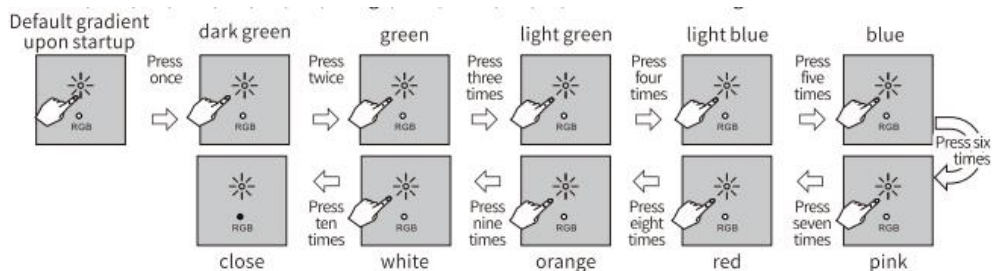

3. Cyclically press the wind speed key to switch the three modes of high gear of atomization-low gear of atomization-stop spray in turn, and cycle in turn. When starting, spray is off by default.

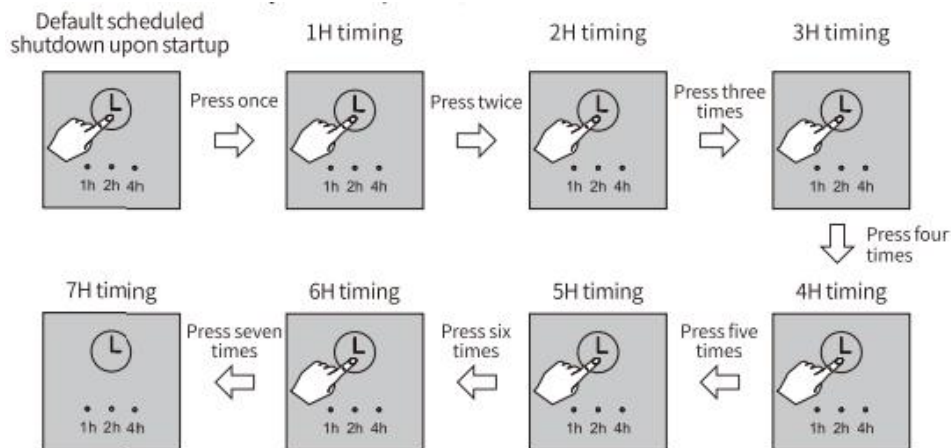

When there is a shortage of water in the atomization chamber, the "L" and "H" indicator lights flash simultaneously, and enter standby mode after five seconds.

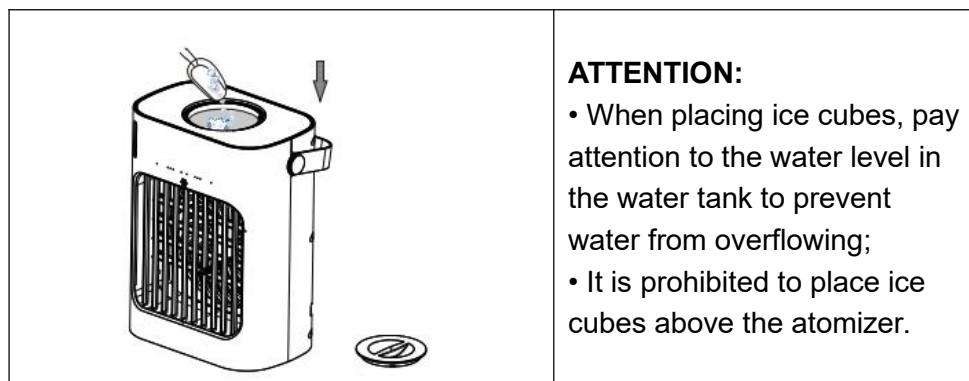

4. Press the light button repeatedly to switch between RGB ambient light colors. The color control sequence is: 1 (gradient)-2 (dark green)-3 (green)-4 (light green)-5 (light blue)-6 (blue)-7 (blue)-8 (red)-9 (orange)-10 (white)-0 (off). The default RGB gradient is turned on.

5. Press the timer button repeatedly to switch between eight modes: 1H--2H--3H--4H--5H--6H--7H--timed off. Cycle in sequence, and the default timed off mode is turned on.

6. When the temperature is high, use a humidified cooling fan to add ice to the water tank, which can lower the atomization temperature and blow out cold air.

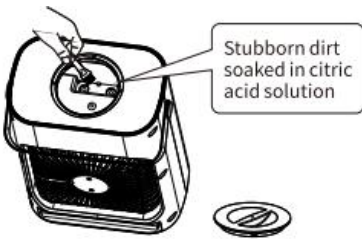

CLEANING/MAINTENANCE

1. During the use of components, regular cleaning and maintenance are required to maintain the machine in its optimal working condition.

① After using the water tank, it is easy to produce scale, which affects the

atomization effect. Before each use, it is necessary to clean the atomization plate with a brush. Stubborn dirt can be soaked in citric acid solution before cleaning.

	ATTENTION: • Do not use sharp or hard tools to touch the surface of the machine. • Do not use detergent casually for cleaning, it is best to use clean water.
---	---

②The external surface and internal dirt of the entire machine can be wiped clean with a soft and damp cloth, and then wiped dry with water stains.

	ATTENTION: • Do not use a cloth with chemical solvents, gasoline, kerosene, or polishing powder to wipe the surface. • When cleaning, it is important to avoid water ingress into the body to prevent Internal electrical components from becoming damp and causing malfunctions. • It is recommended to clean the water tank and atomization tank when using. formorethanthree days.
--	---

DRAINAGE INSTRUCTION

①After long-term use, it is necessary to clean the water in the water storage box and the water on the absorbent sponge;

②Take out the water storage box and absorbent cotton, and pour out the water in the direction shown in the diagram;

Drainage
direction

ATTENTION:

To avoid water overflowing from the water storage box when pouring water, it is necessary to remove the water storage box and absorbent cotton before proceeding with the pouring

③Use a soft cloth to absorb the water from the water tank.

TROUBLESHOOTING

If your humidifier is not working properly, please perform the following checks before requesting after-sales service.

Fault phenomenon	Cause analysis	Troubleshooting
The power on indicator light does not light up	The power plug is not properly plugged in	Plug in the power cord and connect the power.
Water shortage light flashing alarm	There is too much scale in the water tank	Cleaning water tank
No spray when starting	There is scale on the atomization plate	Clean the atomization plate with a brush
Low wind speed	Not reaching maximum gear	Switch to 3rd gear operation
