Smart Induction Cooktops with UltraHeat™ 4.3kW Element

# Next-level performance in sleek style— enjoy precision cooking with LG's induction technology

Take your kitchen to the next level with induction technology that provides even cooking with speed, precision and responsiveness, plus greater safety and energy efficiency than radiant electric or gas cooktops. These built-in cooktops feature a 4.3kW UltraHeat™ element that provides exceptional performance for quick boiling and simmering. The SmoothTouch® glass controls provide sleek style and easy operation with just a touch of your finger. And thanks to induction technology, the cooktop surface remains cooler than radiant electric and gas alternatives, offering greater safety and easier cleanup.

**Performance**

THE PRECISION OF  
INDUCTION WITH BOOST  
AND SIMMER OPTIONS

**Convenience**

AUTOMATICALLY DETECTS  
COOKWARE AND MAKES  
CLEANUP A BREEZE

**Style & Design**

STYLISH BUILT-IN DESIGN  
AND SLEEK CONTROLS

Available  
in 30" and  
36" widths  
to fit your  
kitchen

Available in:

Black

### Performance

## THE PRECISION OF INDUCTION WITH BOOST AND SIMMER OPTIONS

- **Induction Cooktop** — offering precision, speed, and responsiveness for super-fast water boils and scorch-free simmering, induction technology uses electromagnetic energy to heat only your cookware—for greater energy efficiency, safer cooking and easier cleanup
- **Power Boost Mode** — Need extra cooking power? Activate Boost mode to temporarily maximize an element's power output to quickly boil large pots of water or heat large quantities of food
- **Simmer Key** — conveniently achieve the perfect simmer for sauces, stews and more with just a tap

### Convenience

## AUTOMATICALLY DETECTS COOKWARE AND MAKES CLEANUP A BREEZE

- **Automatic Cookware Detection** — for a safer experience, the induction elements only activate when induction-compatible cookware of the right size is detected, and deactivate when cookware is removed
- **Cookware Compatibility Indicator** — rates cookware compatibility for each element on a scale from 0 to 10 to help you optimize power output and performance and improve energy efficiency
- **Safer Operation & Easy Cleanup** — because induction heats only your cookware and not the cooktop, drips and splatters won't burn onto the surface, making cleanup a breeze

### Style & Design

## STYLISH BUILT-IN DESIGN AND SLEEK CONTROLS

- **Stylish, Modern Design** — enjoy the professional look and feel of a ceramic induction cooktop that elevates any kitchen, delivering seamless, built-in style and premium form and function to your countertop
- **SmoothTouch® Glass Controls** — deliver sleek style and easy operation with just a touch of your finger—the smooth surface easily wipes clean for a design that is as practical as it is stylish

**SLEEK  
STYLE**

# Additional Features

## Control Lock

### CHILDPROOF YOUR COOKTOP

- This safety feature allows you to disable most control panel functions
- Helps prevent accidental activation of the cooktop while providing a worry-free experience

## Kitchen Timer

### COORDINATE MEAL PREP WITH THE BUILT-IN TIMER

- Conveniently track and manage meal preparation with the help of the built-in timer
- The easy-to-use timer and display ensure quick visibility to the remaining cook time, while the convenient alarm lets you know when the timer is done

## ThinQ® Smart Features

### GET CONNECTED FOR SMARTER COOKING

- **LG Smart Sync** — sync your cooktop and smart LG over-the-range microwave oven or hood via the ThinQ® app to automatically activate the fan and lights when the cooktop elements are in use
- **Remote Monitoring with ThinQ®** — monitor your elements from anywhere via the LG ThinQ® app for peace of mind wherever you are
