

## **BARN DOOR KITS**

### **Care Instructions**

Take great care of your new barn door and it will love you back for a long time. Once you have it hung, you'll be carefree. Just a light dusting from time to time is all the care it will need.

Prior to hanging it, make sure you store it properly. Lay it flat or keep it in the original crate until you're ready to install it. Never lean it against a wall. Store it in a cool dry place.

Follow finishing manufacturer's directions thoroughly and carefully for primed or unfinished doors.
