Inside

Make the most of your new Nest Thermostat

Here are some quick tips to help get you started with your Nest Thermostat. To learn more visit g.co/nest/thermostatbasics

Fine-tune your comfort.
When you set up your Nest Thermostat, customizing your schedule is fast and easy. And you can always make adjustments from the Google Home app.

Save energy when you're away.
The Nest Thermostat can use a built-in sensor to know when nobody's home, then adjust the temperature to save energy. The Google Home app can also use your phone's location to help your thermostat adjust even faster when you leave.

Get system alerts and reminders.
Your Nest Thermostat can send a reminder if your air filters need to be replaced. Or an alert if it detects your furnace is acting up.

Look for the Nest Leaf.
It appears when you change the Nest Thermostat to an energy-saving temperature.

Every Nest product makes your home even more helpful

Control your thermostat with your voice.
The Nest Thermostat works with the Google Assistant on your phone, or Nest speakers and displays. Just say, "Hey Google, turn up the heat." The Nest Thermostat also works with Alexa and other smart speakers and displays.

Nest products work even better together.
For example, if your Nest Protect senses CO, it can tell your Nest Thermostat to stop the furnace from running.
