Gutter Valley Splash Guard Use Guide

Thank you for choosing our 4 Pcs Gutter Valley Splash Guard. This guide will help you make the most of your product for efficient rainwater management and roof protection.

Installation

. **Prepare the Area**: Before installation, ensure the gutter valley and corner areas where you plan to install the splash guards are clean. Remove any debris, leaves, or dirt that could interfere with the installation process or the functionality of the guards.

. **Position the Guards**: Take one of the splash guards and place it along the gutter valley or at the corner of the gutter, aligning it with the direction of the rainwater flow. Make sure it covers the area where water is likely to splash out.

. **Secure the Guards**: Use the included hardware (such as screws or clips) to firmly attach the splash guard to the gutter. For a secure fit, ensure the guard is level and properly fastened. Repeat the process for the remaining three guards, covering all necessary areas.

Usage

Once installed, the splash guards will automatically divert rainwater into the gutter, preventing it from splashing onto the roof shingles, walls, or foundation. They are designed to handle heavy rain, effectively blocking the flow back into the gutter and keeping water contained within the gutter system.

Maintenance

. **Regular Checks**: Periodically inspect the splash guards to ensure they are still securely attached and in good condition. Check for any signs of damage, such as bending, cracks, or loose hardware.

. **Cleaning**: Remove any debris that accumulates on or around the guards. This will help maintain their effectiveness in diverting rainwater. Use a soft brush or cloth to gently clean the surface of the aluminum guards, avoiding abrasive materials that could scratch the surface.

By following these simple steps, you can ensure that your 4 Pcs Gutter Valley Splash Guard provides long - lasting protection for your house shingle roofs and corners. If you have any questions or need further assistance, feel free to contact our customer support team.
