No More Spills!

Liquilock Eliminates Spills During Toilet and Hot Water Tank Removal

How many times have you removed a toilet only to have water from the S-trap spill all over the floor? Avoid creating more clean-up work for yourself – or stains and damage to your customer's floor – by using **Oatey Liquilock**.

Liquilock is a quick gel formula that solidifies remaining water during toilet and hot water tank removals. The safe, non-toxic formula solidifies in minutes, allowing clean removal of the toilet or hot water tank. No drips. No leaks. No headaches!

It's as easy as 1-2-3:

- 1. Pour** – Turn off supply line. Flush toilet and hold, draining all water from the tank. Pour contents of package into remaining water
 - 1 pack for 1.6 gallon toilet
 - 2 packs for 3.5 gallon toilet
- 2. Gel** – Non-toxic powder gels remaining water in 4 minutes!
- 3. Remove** – Transport the toilet or hot water tank without leaks or messy spills!

For toilets, once the repair is complete, simply reconnect supply lines, refill the tank and flush away the gel!
