**BEFORE YOU START THE ASSEMBLY, PLEASE READ THE FOLLOWING TIPS AND WARNINGS.**

① Do a quick inventory to make sure the package contains all the parts and hardware listed in the assembly instructions.

⑥ Make sure you understand which hardware will be used on each step. Using the wrong size of screw, bolt or pin might strip the threads or cause damage to the part in which it is being used.

② Missing, damaged and defective parts can be replaced at no cost to you. Please refer to the last page in this manual.

⑦ To avoid misalignments, always leave the screws loose and tighten them until all pieces are positioned correctly.

③ The replacement parts service is limited to the 48 contiguous United States. If you reside in Alaska, Hawaii, Puerto Rico, U.S. territories or other countries, please contact the supplier from where the unit was purchased.

⑧ Do not overtighten or force the screws as they might break, strip, damage the threads of the holes or get stuck inside the part.

④ If during assembly you find an issue or need clarification, please contact our Customer Service for assistance. Please refer to the last page in this manual.

⑨ If the hole seems too big or too small for the screw, first make sure you are using the correct size of screw and that it's been installed in the correct hole. Test another of the same screw into the same hole, as well as test the screw onto different holes for the same part. If the hole still appears to be too small, do not force it, it needs replacing.

⑤ On each step read the instructions and analyze the illustrations thoroughly before proceeding to do the assembly.

### CHAIR'S FUNCTIONS

- ① Chairs' height: Pull UP the lever under the seat. The chair goes down while sitting on it, or up if you lift your body.
- ② Seat tilting: Pull the same lever OUT horizontally to unlock this function, and IN to lock again.  
NOTE: Unlike regular office chairs, these racing/gaming chairs have their base components off-center, and the tilting won't be much and might actually feel hard to tilt.
- ③ Tilt tension: Turn the mechanism's knob in either direction to apply more or less tension. With less tension, the tilting will feel easier. Please read the above note about the tilting.
- ④ Backrest reclining: pull UP the lever located on the rear right side of the seat and release it when the desired position is reached.  
**WARNING:** For your safety, the seat's tilt function ② should be in the **LOCKED (IN)** position prior to use the backrest reclining function.
- ⑤ Armrest height: Pull UP the button that is under the armrest. Some models have additional functions like forward/back, in-out and pivot.
