

Installation and Operating Manual

INSTALLATION INSTRUCTIONS

BEFORE YOU BEGIN

- Please read these instructions carefully to familiarize yourself with the required tools, materials, and installation sequences. Follow the sections that pertain to your particular installation. This will help you avoid costly mistakes. In addition to proper installation, read all operating and safety instructions.
- All information in these instructions is based upon the latest product information available at the time of publication. J Sing LLC reserves the right to make changes in product characteristics, packaging, or availability at any time without notice.
- These instructions contain important care, cleaning, and warranty information. Please leave instructions for the consumer.
- Before installation carefully inspect the new fixture for any signs of damage.

WARNING: Risk of injury or product damage. Be careful when opening the door to avoid pinching fingers.

WARNING: Don't use acidic or alkalic cleaners or alcohol to clean the surface. Use a dampened cloth to clean.

CAUTION: Risk of electric shock. Electrical wiring may need to be relocated.

CAUTION: Risk of property damage. Use anchors (not provided) rated for the loaded weight of this product. Refer to the anchor manufacturer's instructions.

Important Information: This cabinet is designed for either right or left door swing. Check the wall cavity for obstructions.

Grounding Instructions

- This product should be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current.

WARNING: Risk of electric shock. Improper use of the grounding plug can result in a risk of electric shock.

- If repair or replacement of the cord is necessary, do not connect the grounding wire to either flat blade terminal. The wire with insulation having an outer surface that is green with or without yellow stripes is the grounding wire.
- Check with a qualified electrician or service personnel if the grounding instructions are not completely understood, or if in doubt as to whether the product is properly grounded.
- This product is factory equipped with a specific electric cord. If the product must be reconnected for use on a different type of electric circuit, the connection should be made by qualified service personnel.

TOOLS REQUIRED

Anchors (as needed)

PARTS SUPPLIED

(1) Position-paper	x 1PCE	(2) Anchors	x 3PCS
(3) Screws for wall	x 3PCE	(4) Mounting Bar	x 1PCE
(5) Support Angle	x 1PCE	(6) Glass panel	x 2PCS
(7) Clips	x 8PCS	(8) Screws for clips	x 8PCS

INSTALLATION for JS-MC-1526 and JS-MC-2026

Verify minimum clearances.

STEP 1

Paste the position-paper on wall and make sure it is horizontal by level.

Suggest
75"
to floor

STEP 2

Drill holes. Insert anchors where needed. Secure the mounting bar with screws.

STEP 3

We provide plug along with cabinet. Optional to cut the plug directly and connect to electrical wiring if using a wall switch.

STEP 4

Lift the cabinet onto the mounting bar. Ensure the hooks engage the mounting bar.

STEP 5

Place the support angle on the bottom of the cabinet. Mark hole location on wall. Drill hole. Insert anchor where needed. Fixed the support angle by screw.

STEP 6

If the door is left open, it can be changed to right open by releasing the hinge and rotate the door, and vice versa.

STEP 7

Install the clips. Insert the shelves between the clips.

STEP 8

Turn on/off the light by waving your hand underneath the cabinet or control by wall switch.

STEP 9

INSTALLATION for JS-MC-2030 and JS-MC-2430

We separate left-open door and right-open door for these models, they are not interchangeable. Luminous area is on top of the cabinet.
Make sure you are installing correct one.

STEP 1

Verify minimum clearances.

STEP 2

Paste the position-paper on wall and make sure it is horizontal by level.

STEP 3

Drill holes. Insert anchors where needed. Secure the mounting bar with screws.

STEP 4

We provide plug along with cabinet.
Optional to cut the plug directly and connect to electrical wiring if using a wall switch.

STEP 5

Lift the cabinet onto the mounting bar.
Ensure the hooks engage the bar.

STEP 6

Place the support angle on the bottom of the cabinet. Mark hole location on wall. Drill hole. Insert anchor where needed. Fixed the support angle by screw.

STEP 7

Install the clips. Insert the shelves between the clips.

STEP 8

Turn on/off the light by waving your hand underneath the cabinet or control by wall switch.

STEP 9

INSTALLATION for JS-BAR-26 and JS-BAR-30 Light Bar (optional for purchase)

- Paste light bar by double faced adhesive tape.
- Plug in the socket on top of the cabinet. There are 2 sockets on top of the cabinet, 1 on each side.
- Control the light bar on/off by cabinet switch. It will be on/off along with the cabinet LED light.

DOOR ADJUSTMENT (IF NEEDED)

Adjust corresponding screws on the hinge to align the doors, ensure that gaps are even and the doors open and close smoothly.

Adjust door gap

Adjust gap between door and cabinet

Replace door mirror

INSTRUCITON for combination

- Make sure your door open direction is correct
- Make sure you have one LED light bar between each cabinet

STEP 1

- Measure total length of cabinets, including the LED bar in the middle.
- Adjust to your target location.

STEP 2

- Install first (count form left to right side) cabinet according to above instruction guide.
- Paste the LED light bar on the right side of the cabinet. And you should NOT put the LED light bar flat to the cabinet door, the bar needs to be recessed by at least $1/4"$.
- Lift the second cabinet onto the mounting bar, and push it to left side. Install the support angle to fix the cabinet.

STEP 3
