

## Use and Care

**Dusting** Dust Shelves frequently with a soft lint-free cloth. You can dampen the cloth slightly with water or spray-type dust remover.

**Spills** Clean spills immediately. Use a clean cloth and mild soap if necessary. Wipe dry with a clean soft cloth.

**Cleaning** There are a number of products available for your wood cleaning needs. We recommended products are available at many stores nationwide including Home Depot. A more economical way to remove grease buildup from shelves is to use Fantastik. Apply and remove quickly, then wash your cabinets with a mild soap. After washing, dry thoroughly and apply a silicone-free polish.

**Polishing** We recommend that you wash and polish shelves once or twice each year. Use a light coat of quality furniture polish.

**Don't** Never use detergents, soap pads or steel wool on your shelf. These harsh abrasives will mar the wood finish. Additionally, we recommend that you avoid the use of paste wax and polishes that contain silicone; the wax buildup is difficult to remove and will leave a residue that attracts dust.
