6" x 6" x 1/4"	130	64

* In case of grouting natural stones, it is necessary to execute a preliminary test, in order to verify the absorption of resin by the stone.

* When using the grout with natural stones, it is necessary to conduct a preliminary test to ensure desired results. Light stones may need to be sealed on top and edges to ensure resin will not discolor the stone. All types of stones may darken due to resin sinking to the surface. See full warnings and cautions at www.TileDoctor.com

NEVER SETTLE FOR BORING GROUT!

Crystal Glass Grout now available with unparalleled depth and Jewel colors that are the perfect adornment for fine glass tiles.

True Ruby J.7 Crystal Glass Grout Jewels®

27 DIFFERENT COLORS TO CHOOSE FROM

DESCRIPTION

Jewels additives used with Starlike® Crystal Glass grout with unique and exclusive effects without prejudicing the ease of cleaning of the product when mixed together with the two-part epoxy mortar STARLIKE® Crystal Glass. This additive is available separately, in pre-measured packages for 2.5 kg Starlike®. *Only to be used with Starlike® Crystal Glass Grout.

Starlike Crystal Glass Grout Jewels®

Crystal Glass Grout is now available with unparalleled depth when used with Jewel colors that are the perfect adornment for fine glass tiles.

FIELDS OF APPLICATION

Special additives for the Starlike® two-part epoxy mortar suitable for grouting floor and wall tiles, grès stoneware, mosaics, clinker in interiors such as: bathrooms, kitchens, floors and shops, columns, etc.

MIX PREPARATION

Mix part B (catalyst) with part A (Glass Grout) of the 2.5Kg Starlike® bucket using an electric drill equipped with mixing paddle until a uniform, lump-free mix is obtained.

Pour the third component (any of the 27 Jewels packets) already prebatched in its package and mix until obtaining a smooth mixture.

APPLICATION

Introduce the mortar into the joints using a rubber float and clean with water following the instructions on the Starlike® packaging.

WARNING

- Do not apply Starlike® epoxy mortar mixed with the Jewels packets on ceramic surfaces in contact with chemical weapons such as on industrial floorings.
- Do not mix the Jewels additive with Starlike® Color Crystal, Starlike® Classic Collection or Glamour Collection, Starlike® Metallic Collection, Starlike® Decor or Starlike® Monomix
- Handle the additives with care as they have a very low specific gravity and are therefore extremely volatile.
- If the ceramic tiles are exposed to sunlight or artificial light, the effects obtained will be more noticeable.

Products to grout and clean
