

# Use and Care Instructions

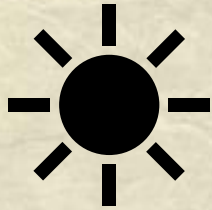

## Calathea Rufibarba

### Fuzzy Feathers

Grown by United Nursery, the Calathea Rufibarba, which is more commonly called "Fuzzy Feathers" due to the leaves shape and the fact that the undersides have little hairs on them. The Calathea's plant has an upright growth habit with long, curvy leaves. But what really stands out is the purple undersides of the leaves which provide interesting and unique texture to any room of your house or office.
