

## Tips From The Stone Care Experts

- Never use ordinary, everyday household cleaners on natural-stone surfaces. They damage natural stone and can lead to costly repair or replacement.
- It is essential to frequently seal your stone to maintain maximum surface protection.
- Use and keep door mats clean to minimize the dirt and micro particles from wearing into your stone floors.
- Be sure your vacuum attachment does not scratch stone floors. Avoid dragging objects across stone floors. Weekly damp mopping keeps the floor free of abrasive particles.
- Daily or as-needed cleaning of your counter tops will reduce dirt, oil penetration and water spotting.
- Using a squeegee on shower walls helps prevent water spotting and soap build up.
- Using polish on counter tops and shower walls will enhance color and sheen and provide added protection to help prevent etching, water spotting and soap scum build-up.
- Don't polish floors. They will become too slippery.

# The Importance of Stone Care

Although incredibly durable, natural stone requires proper care to maintain its inherent beauty and to avoid costly repair and replacement.

A penetrating sealer is typically used to protect against stains by blocking pores and small fissures in the stone, keeping liquid on the surface where it can be easily removed. Most everyday, ordinary household cleaners, however, contain ammonia or other harmful chemicals that break down the protective seal, making the stone more susceptible to staining and reducing its luster and durability. Common toiletries like perfume and toothpaste also contain ingredients that damage stone or degrade the protective seal.

To keep your natural stone looking brilliant, it's best to use products that are specifically formulated to prevent deterioration and enhance the beauty of natural-stone surfaces.

Granite Gold Inc., a company with 50 years' experience in the natural-stone industry, offers a complete line of safe, effective, ammonia-free natural stone-care products. Our products have been trusted for years to clean and protect any kind of natural or manufactured stone or tile surface.

## Daily Cleaner

*This unique, streak-free formula safely deep-cleans granite, marble and other stone surfaces. Leaves a fresh citrus scent. Should be used regularly in place of everyday household products or polishes, which can damage natural stone.*

## Polish

*Quickly and easily adds shine and luster to granite, marble and other stone surfaces. Regular use after cleaning will bring out stone's natural beauty and provide ongoing protection against water spots and fingerprints. Polishing shower walls and tub surrounds will help prevent soap scum build-up.*

## Sealer

*Quickly and easily preserves and protects all natural stone. Frequent use maintains maximum surface protection, penetrating stone surfaces to provide superior, long-lasting resistance to staining, etching and soil build-up.*
