

INSTRUCTION GUIDE

BELL HANGER

Oatey

1 Choose desired location for support i.e., stud, joist, or finished wall surface. Check with local codes to determine spacing between clamps.

2 Loosen the two short Philips head screws to allow the top half of the clamp to swivel freely .

3 Anchor the Bell Hanger into the final location using the long course thread screw (provided). If securing Bell Hanger to concrete, discard the provided course screw and use an approved concrete anchoring method.

4 Insert pipe into clamp and tighten short Phillip head screws to secure pipe into place.
