

Easy to use:

Door

1. Ensure painted surfaces are completely dry and even. **DO NOT** apply this product to unprepared (not painted) wood frames.
2. Installation: **DO NOT** apply gasket in one piece. Cut to size, three sections for proper placement. **DO NOT** stretch gasket material when applying.
3. Hinge Side of Door Jamb: Point narrow end of gasket away from door stop and press into place on door jamb frame where the hinge side of frame meets the door stop. Continue to remove the paper backing and carefully position gasket into place until hinge side of frame is installed. Trim as required.
4. Header & Lock Side of Jamb: Install gasket to door stop. Point narrow end of gasket away from door frame and press gasket into place. Continue to remove the paper backing and carefully place gasket into place until header and lock side (two separate pieces) of frame are installed. Trim as required.
5. Adjustment of Gasket & Setting of Adhesive: Gasket may be gently removed and repositioned within the first hour of application. Adhesive will take a permanent set in 24-48 hours, depending on surface temperature of frame.

Window

Place gasket on bottom of sash rail to form seal when window is closed.
