CHARGING INSTRUCTIONS

THE MULTIFUNCTIONAL LED LIGHT MUST BE FULLY CHARGED BEFORE BEING USED FOR THE FIRST TIME. IT IS RECOMMENDED THAT THE BATTERY BE RECHARGED EVERY 3 MONTHS TO ENSURE MAXIMUM PERFORMANCE.
The AC and DC charging adapters are for recharging the battery only, they cannot be used to directly power the light. Always ensure that all the switches are in the OFF position while charging.

USING THE AC CHARGING ADAPTER:

1. Plug the AC home charger jack into the charging port on the bottom of the light next to the charging indicator LED.
2. Plug the other end of the AC home charging adapter into a live 120V AC power outlet
3. The charging indicator light will glow RED while charging is in progress.
4. The battery will be fully charged after approximately 8-10 hours and the RED charging indicator light will turn GREEN when the unit is fully charged.
5. Disconnect the AC home charger from the light first and then the other end from the power outlet.
   TO PREVENT OVERCHARGING DO NOT CHARGE FOR MORE THAN 12 HOURS CONTINUOUSLY.

SAFETY PRECAUTIONS

Use the 120V AC charging adapter indoors un a dry location only. Exposure to damp or wet conditions could cause a shock or damage to the adapter.
Do not use the charger near flammable liquids or materials.
Store in dry location and do not allow the charging adapter to come in come in contact with water, rain or snow.
If the charging adapter comes in contact with water, place in a dry location at room temperature, on a soft absorbent towel and allow to dry thoroughly.
Do not operate the unit until is completely free of moisture.
Use only the AC charging adapter supplied with the light. Do not attempt to charge the light with an adapter that is not compatible as this could result in a fire, damage to the light or personal injury.

The AC CHARGING ADAPTER complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

USING THE DC VEHICLE CHARGING ADAPTER

1. Plug the DC Vehicle charger jack into the charging port on the bottom of the light next to the charging indicator LED.
2. Plug the other end of the DC adapter into the vehicle's 12V DC cigarette lighter or accessory power socket
3. The charging indicator light will glow RED while charging is in progress.
4. The battery will be fully charged after approximately 8 to 10 hours and the RED charging indicator light will turn GREEN when the unit is fully charged.
5. Disconnect the DC vehicle charger from the light first and then the other end from the 12V power outlet.
   NOTE: SOME VEHICLES REQUIRE THE KEY TO BE ON ACC POSITION TO ACTIVATE THE 12V DC ACCESSORY OUTLET.
   TO PREVENT OVERCHARGING DO NOT CHARGE FOR MORE THAN 8 HOURS CONTINUOUSLY.

SAFETY PRECAUTIONS

The DC charging adapter can be used in most vehicles by plugging into the 12V DC cigarette lighter or accessory power socket.
Store in dry location and do not allow the charging adapter to come in contact with water, rain or snow.
If the charging adapter comes in contact with water, place in a dry location at room temperature, on a soft absorbent towel and allow to dry thoroughly. Do not operate the unit until is completely free of moisture.
Use only the DC charging adapter supplied with the light. Do not attempt to charge the light with an adapter that is not compatible as this could result in a fire, damage to the light or personal injury.

CARE AND MAINTENANCE STORAGE

Store the multifunctional LED light and charging adapters in a clean and dry area. Be sure to keep the charging adapters supplied with this product stored separately from similar items as only charging adapters included with this light are compatible. Using an non-compatible charger could cause damage to the light and / or personal injury.
The Multifunctional LED light may also be store in a vehicle for use in roadside emergencies. To prevent light and any other accessories being damaged, ensure that it is properly secured and in a safe place inside the vehicle.

CLEANING
All exterior surfaces of the multifunctional LED light can be wiped clean with a soft cloth dampened with a mild soap and water solution. Do not immerse or submerge any parts of the light in water or any other solvent. Never use solvents or cleaning agents containing petroleum (petrol, kerosene, oil), paint thinner, turpentine, alcohol or ammonia. Harsh materials like these can damage the surfaces.

MAINTENANCE
Only qualify service personnel must perform repairs. Do not open the exterior casing of the LED light as there are no user serviceable parts inside. Opening or visible attempts to open or repair the light may void the warranty and / or cause damage to the unit or personal injury. LED bulbs do not need to be replaced.

This product contains an internal Lithium-ion battery pack formulated from environmentally sensitive materials. This product must be disposed of properly with due care for the environment. Please return this product to your local dealer or local recycling center where batteries will be recycled or disposed of properly.
