HALO® Recessed RA 4" & 6" Direct Mount Adjustable Gimbal

HALO is pleased to announce the 4-inch and 6-inch RA Direct Mount Adjustable Gimbal. The smooth lens provides visual comfort and the WFL distribution patterns are ideal for accent illumination. Requiring only 3-½" of plenum depth, the RA-DM can be installed virtually anywhere and reduces installation time and expense. This solution is excellent for Mixed-Use dwellings as well as traditional residential.

The low-profile driver / junction box can be installed through the ceiling cutout and positioned remotely providing clearance from potential obstructions making it ideal for both new construction and renovation work. The RA-DM is also compatible with the HL4RSMF / HL6RSMF new construction mounting frames.

Field selectable color temperature provides SKU consolidation opportunities at distribution and flexibility during installation. Applications include living and dining areas, bedrooms, kitchens, home offices and mixed-use spaces – anywhere where task or accent lighting is desired.

Features at a Glance
