TULIP CANDY STRIPER BLEND

Tulips are the indispensable blooms of the spring garden, as they bring it to life! They are unique in the range of size, shape, and bold color found in almost every color spectrum, that only tulips provide. Tulips are suitable for a wide range of plantings, are excellent in the rock garden, in formal beds, as elegant cut flowers, and for containers. They can be used in nearly any garden design scheme. Flowers are upward facing, with linear to lance-shaped green leaves on the stem. Tulip descriptions can become quite technical, as they are grouped into 15 different divisions, describing the petals, stamens and leaves in detail. Plant several different varieties of tulips throughout the garden to extend the blooming time.

*Unique color pairing*

*Huge flowers*

*Good perennializers*

*About This Variety:* This tulip blend is made up of Delight Tulips, which are among the newest Darwin Hybrid tulips. They produce huge flowers and make an impressive show in the garden. They are among the best for perennializing, without much effort for years to come in suitable zones. Just leave them in the ground. Our measured mixture, hence called a blend, includes all the Delight colors: cherry red, apricot pink, rose, and cherry red with white petal edges. Bold, candy striper color. Tall and longer blooming. Exceptional!

*Growing Instructions:* To ensure optimal results, allow adequate space and sunlight, plant at the appropriate depth, and feed with a well balanced fertilizer. Remove the flowers as soon as they fade, but allow the leaves to yellow before removing. Best planted in late fall. Some gardeners treat tulips as annuals. For an informal look, plant in groups in natural swathes or bouquets.

*Care Tip:* In USDA zones 8-10, refrigerate the bulbs for no less than eight weeks. In the garden, plant them before frost, but not as early as in the northern part of the country. Planting them in a lightly shaded area will keep them cool and prolong blooming.

*Exposure:* Full sun to partial shade

*Height:* Grows 21-24" tall

*Spacing:* Plant 4-8" apart, 4-8" deep

*USDA Zones:* Hardy in USDA zones 3-7

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
