

PERGO LIFE

PERGO HIGH PERFORMANCE WOOD — REALLY TOUGH,
REALLY BEAUTIFUL FLOORS BUILT FOR REAL LIFE.

Life never stops.

So Pergo handles just about everything.

Home is where the heart is. And everything else for that matter. It's an office, a school, a sports arena, a disco and much more. That's why Pergo is made for people who really live on their floors. Dents, scratches, stains and spills are no problem because these floors are built to stand up to life's everyday accidents. Thanks to premium construction and exclusive technologies, our floors are made to take it all. So, bring it on ... kids, pets, messes. Pergo is tough enough to take it. Leaving your life worry-free.

Choose high performance Pergo floors.

You'll be glad you did.

High-heeled shoes, cat claws and dog paws, art projects, kitchen mishaps — the floors in your home face tough challenges. With PERGO, you can have the authentic look and feel of classic hardwood without giving up any of the performance your life needs. In addition to being water, wear and stain-proof, our floors offer incredible scratch-resistance.

Laminate Wood

PERGO laminate floors are made from wood and built on a platform for that adds strength and stability. They feature a décor printed with a high-definition process and advanced embossing and texturing techniques to make the planks look and feel like genuine solid hardwood. These floors range in thickness, but the premium quality core provides a more stable floor and a more natural sound. PERGO laminate floors feature a protective surface coating for superior durability with guaranteed performance against water, stains, and wear.

Engineered Wood

PERGO engineered wood floors are true wood decors engineered for better performance and easier installation. They feature a genuine hardwood veneer pressed onto a fortified wood core to add strength and stability. Protective coatings augment the surface to enhance the floor's endurance so you can live an active life without worries of harming the floor.

Both engineered hardwood and laminate wood are made from organic materials, but they can be installed in places that solid hardwood floors just won't go.

Waterproof vs. Waterproof and Water-tight

Many laminate or engineered wood floors and luxury vinyl floors offer waterproof protection; however, the technologies are not all the same. While luxury vinyl planks feature a plastic-based core and are waterproof throughout, the wood-based floors use a waterproof surface to protect the core like a raincoat.

In both cases, if the floor's joints are not water-tight, liquids may still be able to leak through and cause damage to the subfloor underneath. No matter what type of waterproof system is used, if the joints of the floor are not water-tight, liquids can get through. PERGO floors offer SpillProtect® technology — a top-down waterproofing system that combines a waterproof coating with water-tight joints that lock liquids on top of the floor.

Durability

PERGO floors offer superior performance when resisting stains and wear. Even paint and nail polish can be cleaned away with the appropriate cleaners. (See warranty for complete details.) The premium quality core material allows for added stability, and the surface textures offer a more natural feel when standing or walking.

Authentic Wood Looks

PERGO engineered hardwood floors feature a décor layer of authentic hardwood. PERGO laminate wood floors use a high-quality printing process and embossing and texturing techniques to create planks that look and feel like genuine hardwood. So, it's hard to tell the difference between a PERGO floor and solid hardwood.

The plus means more!

Pergo offers a range of flooring, so it's easy to find just the right floor for your family. All Pergo floors are easy to install and easy to take care of. And, naturally, Pergo offers superior durability, including protection against wear, fading, stains and scratches. Plus, each collection offers its own unique styles and features designed to meet your needs and your budget.

* The antimicrobial properties do not protect users against bacteria, viruses, germs, or other disease organisms.

You'll find these great features on our flooring collections:

① SpillProtect[™] waterproof technology

Pergo floors with SpillProtect[™] stop water really fast. That's because they provide top-down waterproof protection that protects your floor. It's a total waterproof solution built into every plank. A proprietary combination of ultra-tight locking joints and a water-repellent coating keeps spills on the surface of the floor, so they won't seep into the core and damage the planks.

② Antimicrobial-protected flooring

Antimicrobial properties are built in to inhibit the growth of bacteria that may affect your floors.

⑤ Commercial grade wear resistance

The Abrasion Class 5 rating on Defense+ laminate wood flooring means your floor won't wear through with continued heavy traffic.

PERGO XP™

Floating
floors and
underlayment.
They're the
perfect pair.

PERGO® FloorMate™

Underlayment ...

It's the socks to your shoes.

The jelly to your peanut butter.

The pad to your mattress.

Hardly anyone thinks about it when buying floating floors. But underlayment is essential for floating floors without attached pads. And for floors with an attached pad — well, it makes them even better.

Pergo® FloorMate™ underlayment can increase the comfort and performance of your floor by providing additional insulation and moisture protection. So, when you choose your new Pergo floor, pick up Pergo FloorMate. Because this perfect pairing makes a better floor. It's the only underlayment approved for use with Pergo floors with attached pad.

Your floor performs better with Performance Accessories.

Your floor isn't finished without the appropriate moldings and trim. They cover the gap between your floating laminate wood floor and a wall or architectural detail and help transition between thresholds or different types of flooring.

VISIT [HOMEDEPOT.COM](https://www.homedepot.com) TO SEE AVAILABLE OPTIONS AND COLORS

QUARTER ROUND

Available in coordinating colors and paintable white.

WALL BASE

Available in coordinating colors and paintable white.

STAIR NOSE

Provides a matching surface for the stair's leading edge and covers the gap between the riser and the tread.
