
CLEAN

Clear the space and thoroughly sweep the subsurface.

STEP 1

Facing the garage door, lay the first tile and edge in the front, left corner. The tile should be positioned with the loops facing the back wall of the garage and the right side wall.

STEP 2&3

Build the first row of tile and ramp edging along the front of garage opening working left to right, then front to back.

STEP 4

Continue filling in the remaining area to be covered working in a 'L' shape from left to right then front to back.

TRIM

Trim any tiles as needed and attached all ramps.

REMEMBER

Leave an expansion gap of ¼" to ½" along all walls and other stationary objects.

Be sure the rubber seal on the bottom of the garage door contacts garage floor not the tile.
