- PAINTABLE
- EASY WATER CLEAN-UP

Phenoseal® Vinyl Adhesive Caulk is a premium-grade, all-purpose caulk ideal for **BONDING, CAULKING & SEALING** a variety of building materials.

FOR BEST RESULTS: Apply in temperatures above 40°F. Do not apply when rain/freezing temperatures are forecasted before full cure can occur. Do not use for filling butt joints, surface defects, tuck-pointing or continuous underwater use. Not for use between two non-porous surfaces or with mirrors. Joint size should not exceed 1/4" wide x 1/4" deep. If depth exceeds 1/4", use foam backer rod. Store away from extreme heat/cold.

INSTRUCTIONS: 1. Surface must be clean, dry & free of old caulk. 2. Cut nozzle at 45° angle to desired bead size. 3. Load into caulk gun. 4. Apply caulk to surface. 5. Smooth bead if necessary. 6. Clean up excess uncured caulk with damp sponge before it skins over. Cured caulk must be cut or scraped away. 7. Allow caulk to dry at least 2 hours (longer in cool/humid conditions) before painting with latex or oil-based paints. 8. Caulk will cure in 12 to 48 hours depending on joint depth, temp. & humidity.

COVERAGE: 55 linear ft at 3/16" diameter bead

Contains propylene glycol. Use in well-ventilated area. Do not get in eye or on skin. Do not ingest. Use gloves and safety glasses. In an emergency, call your poison control center at 1-800-222-1222.
