an NAHB Green Building Award.

TAHOMA ENVIRONMENTAL
BUSINESS AWARD

In 2005, McFarland Cascade received the
Tahoma Environmental Business Award for being a
caring, contributing member of the community.

Lifetime Limited Warranty

Covering your use of CA treated wood for as long as you own your home or farm.

When used in an application which is consistent with the intended end use identified on the product label or stamp and in conjunction with a residential or agricultural structure located in the United States of America, then subject to the conditions contained in this Warranty, your CA treated wood is warranted against such damage by termites or fungal decay as would make the lumber structurally unfit for the applications for which it was intended.

This warranty is good from the date of purchase for as long as you own the property on which your new CA treated wood structures are built. This warranty is applicable to the original purchaser and property owner only, and is not transferable to any other property owner. The original consumer purchaser will be entitled to be reimbursed for the actual, reasonable cost of new CA treated wood which is purchased to replace wood which was made structurally unfit by damage due to termites or fungal decay. To obtain the necessary prior approval for, and make arrangements for, this reimbursement, the original owner must send sufficient amount of CA treated wood was originally purchased to cover the number of board feet claimed to be damaged, to the Warrantor, at:

CA treated WOOD • Warranty Claim Administrator
L.D. McFarland Company
P.O. Box 1496 • Tacoma, WA 98401-1496 • www.mcfarlandcascade.com

When making any warranty claim you may be required to send photographs and/or pieces of damaged wood. In addition, at the Warrantor's request, the Warrantor and its representatives and agents must be permitted to inspect and test the damaged structure.

Warrantor shall not be liable hereunder for damage to CA treated wood resulting from any case other than termites or fungal decay, or for any damage to wood which has been used in a structure outside of the U.S.; used in foundation systems (such as the Permanent Wood Foundation, and piling, pole or heavy timber type residential construction); used in swimming pool sidewalls; used as fence posts, vineyard stakes or tree supports in agricultural applications; used where immersed in salt water; used for commercial or industrial projects; used in commonly owned property and structures such as condominiums; or used for an application or in a way that is not consistent with the end use identified on its original label stamp.

Warrantor shall not be liable for any installation, repair, construction, labor or similar costs, or for any costs or damage which may be associated with the natural characteristic of some wood to split, crack, warp, or twist. To the maximum extent permitted by applicable law, in no event shall Warrantor be responsible for any direct, indirect, incidental, consequential or financial damages or expenses of any kind whatsoever, howsoever caused (whether or not due to any deficiency or negligence in manufacturing, and whether or not relating to loss, damage, death or injury) arising out of or relating to your purchase or use of CA treated wood.

For hem-fir, Douglas fir, and western hemlock, this warranty is null and void unless all cut ends and bore holes were properly coated at the time of construction with a suitable wood preservative, such as End Cut Solution, containing a minimum of 1% copper. Proof of purchase of the preservative is also required. These species are covered by this only when used in the states of Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming and Hawaii (except for unincised decking which does not meet AWPA recommended standards, which is specifically not warranted by Warrantor in Hawaii).

By purchasing CA treated wood you accept this Warranty and hereby acknowledge that this replaces all other representations, warranties, guarantees, terms, covenants, agreements, promises, commitments, duties of care or conditions ("Representations"), expressed or implied, statutory or otherwise, indulging, quality or suitability, and there are no Representations whatsoever with respect to CA treated wood except the specific warranty given hereunder. Only the Warrantor is liable under this Limited Warranty and the directors, officers, employees and agents shall have no liability of any kind to you or others with respect to your purchase or use of CA treated wood.

CA PRESSURE
TREATED WOOD
from McFarland Cascade®

Trusted Treater and Distributor Since 1916
800-426-8430 • McFarlandCascade.com

Preserving lumber is a common sense approach to responsible timber conservation.

Using quality CA treated wood is one way a concerned homeowner can play an active role in managing our natural resources. It's a simple equation—longer lasting wood equals a lower demand for new lumber. Plus, by extending the life of wood, CA treated helps the environment by reducing the amount wood that ends up in our landfills.

Copper Azole* is the safest, most effective preservative we've found. It contains no arsenic. And, it has a proven track record. This is why CA treated comes with a lifetime limited warranty against termites and fungal decay.

Doing our part by operating clean facilities.

Since 1916, our family-owned operation has taken a pro-active approach toward the environment. Some recent examples include: installing enclosed treating systems that create no wastewater (This was done before guidelines were even being enforced.) and, all the rainwater that falls onto our 43 acre facility is filtered through a multi-step process to further safeguard local waterways.

**The Copper Azole formula is only made available to select wood preservers. McFarland Cascade is proud to be one of them.*

Quality control at every level.

Standardized operating procedures are also followed to ensure that best practices are being maintained. Routine operations are regularly observed and reviewed to enhance results and eliminate any potential for environmental concerns. We also regularly audit our operations and access new practices in the wood treating industry to ensure we operate using the best methods available.

This commitment to practices, product and service has helped us grow into one of the largest, most respected manufacturers and distributors of pressure treated utility poles, lumber and plywood in America. Our goal for the future is to continue to investigate and deliver new products and technologies that can make your life better while keeping our environment healthy.

CA treated is more than Green.

The benefits of choosing CA treated go beyond being environmentally friendly. Besides being the perfect choice for framing and substructures, McFarland Cascade also offers a finish line of CA treated lumber. Outdoor Select™ Decking and Accessories are a great way to get the rich look of natural

cedar without the added expense. This line features:

- **Sorting at the plant to eliminate unsuitable boards**
- **Kiln drying prior to treatment**
- **Cedar tone added for enhanced natural appearance**

McFarland Cascade is more than CA treated.

We offer a wide variety of quality outdoor building products to complement our full line of treated woods:

- **Tropical Hardwoods**
- **StoneDeck™**
- **Composite Decking**
- **Cascade Railing**
- **RainEscape®**
- **Bison™ Level.it®**
- **DrySnap™**
- **Royal Trim Board®**

Use and Safety Information

Your CA pressure treated wood has been preserved with the EPA-registered pesticide, Copper Azole, to protect it from termite attack and fungal decay. Exposure to Copper Azole and all treated lumber may present certain hazards. Therefore, the following Use and Safety Information should be read and all the recommended precautions on this list and on the website should be followed.

• Visit www.McFarlandCascade.com FOR COMPLETE USE & SAFETY INFORMATION.

- For a deck floor: butt boards together if wet and heavy; separate boards slightly (max. 1/8 inch) to allow for future swelling.
- Hot-dipped galvanized fasteners (meeting ASTM A153) and connectors (ASTM A653 Class G185) or better are recommended.
- For Permanent Wood Foundations, use 304 or 316 stainless steel.
- Do not use aluminum in direct contact with pressure treated wood.
- Apply an effective water repellent as soon as the project is completed and then re-applied every year or two in order to protect against moisture damage.
- DO NOT USE TREATED WOOD WHERE IT MAY COME INTO DIRECT OR INDIRECT CONTACT WITH DRINKING WATER OR WHERE IT MAY BE A COMPONENT OF FOOD OR ANIMAL FOOD OR IN CONSTRUCTION OF BEEHIVES WHERE IT MAY BE IN CONTACT WITH THE HONEY.
- All sawdust and construction debris should be cleaned up and disposed.
- TREATED WOOD SHOULD NOT BE BURNED.
- Wear protective clothing, gloves, dust mask, and goggles when working with treated wood.
- Avoid frequent or prolonged inhalation of treated or untreated wood.
- WASH EXPOSED SKIN THOROUGHLY AFTER WORKING WITH WOOD.
- Work clothes exposed to treated and untreated wood should be laundered immediately and separately from other clothing.
