THE SMARTER WAY TO MANAGE YOUR TOOLS, TEAMS AND JOBSITES

ONE-KEY™, Milwaukee Tool's industry-leading connectivity platform, is designed to help you manage your tools, teams and jobsites across your business, no matter the scale. Whether you're tracking assets, assigning tools to teams or streamlining operations, ONE-KEY™ makes it easier to keep everything organized, secure, and efficient—right from your phone, tablet or computer.

HOW ONE-KEY™ WORKS

SMART TOOLS & DEVICES

Precision settings for repeatability. Machine learning for safer installations.

CLOUD-BASED ACCESSIBLE SOFTWARE

Your entire inventory, backed up and available anytime, anywhere – phone, tablet or computer.

DATA & INTEGRATIONS

Seamless connections with leading industry platforms.

TOOL TRACKING

Know where your tools are and prevent unauthorized use.

A PLATFORM DESIGNED FOR THE TRADES

- Built-in Bluetooth® tracking – no external hardware required
- Completely free and accessible across all devices
- Over 130 smart tools and growing
- In-house app development with a relentless focus on user needs
- The industry's most advanced tool management system is in your hands

WHY ONE-KEY™?

BENEFITS	DETAILS	RELEVANT ONE-KEY™ FEATURES
Deter Theft & Misuse	Keep tabs on your tools and protect your investment with built-in security features	Tool locking, tool tracking, geofencing
Get Organized	Store essential tool and purchase details in one place for quick access	Item detail: proof of purchase/receipts, serial number storage, warranty info
Customize Performance	Dial in precision settings to get the job done right	RPM precision, light controls, locking
Locate Lost Equipment	Track your tools in real time using the industry's largest Bluetooth® tracking network	Tracking, geofencing, alerts
Manage Tools & Teams	Assign tools to team members and jobsites with ease	People, places, transfers, kits, item detail
Access Tool Data	Stay compliant, improve productivity, and make smarter decisions	Reports, tool data
Streamline Communication	Keep your crew in sync with real-time updates and insights	Items, notes, people, kits

ONE-KEY™ TOOL FEATURES

ONE-KEY™ ENABLED TOOL FEATURE	WHAT IT DOES	VALUE
Track	Free to use proximity-based tracking, leveraging the industry's largest Bluetooth® tracking network from tools & trackers to phones & tablets with the ONE-KEY™ app.	Visibility, cost savings, & asset retention
Manage	The industry's best inventory management software experience, allowing for the management of items, kits, crews, jobsites, vehicles, home bases, tool & equipment service, warranty requests, bulk transfers, and more.	Own the supply chain of your tools and equipment
Lock	Lock out a tool directly when connected, or submit a background lockout request by marking the tool stolen (rendering the tool useless to a thief).	Theft deterrence; asset retention
Custom Drive Control	Ability to customize the RPMs of the tool and save those settings to the "mode" pad on the tool.	Customize for optimal power based on application
AUTOSTOP™ Toggle & Controls	Safety feature that aims to mitigate severe kickback events on drills, hammer drills, core drills, grinders and more.	Mitigate injuries due to kickback events
Precision Mode	Customizable impact counting mechanism that assists in the accuracy of fastening events on tools equipped with custom drive control.	Dial in your tool's performance
Trigger Ramp-Up	Customizable setting that changes the rate of a tool's acceleration to its set speed or RPM limit.	Dial in your tool's performance
Speed Controls (Rpm)	Controls limit how fast a tool can operate. Customize these modes in the ONE-KEY™ app and save them to the tool's physical mode pad.	Customize for optimal power based on application
TORQUE-SENSE™	Train a Torque-Sense™ tool (e.g. controlled torque impact wrench) to achieve specific torque-values; save them to the tool's mode-pad.	Fasten with precision
Quality Assurance Reporting	Measures the output of hydraulic or precision fastening tools while communicating that data to the cloud, allowing for desktop-based reporting on quality of installation.	Ensure each step of fastener or fitting installation was done properly
Precision Torque	Allows for the selection of individual, moded, or grouped torque settings for torque accuracy within 2%.	Fasten with maximum precision
Cut-Brake	Cut-brake technology reduced risk at the end of a cut by detecting risk-inducing tool events. If cut-brake activates during a cut, the tool will shut off and the indicator will blink green.	Mitigate injuries due to kickback or bind-up events
Full Remote Controls & Notifications	Allows for remote control of the tool within 100'; surfaces notifications via the ONE-KEY™ app that may need attention. Remote controls include powering unit on, adjusting charge rate, AC autostart toggles, and more.	Customize and troubleshoot when needed
Adjustable Charge Rate	Adjust charge rate in the ONE-KEY™ app to recharge batteries and equipment without overloading circuit breakers.	Charge when, where, and how you want to
Self-Tapping / TEK Screw Mode	Self-Tapping Screw Mode is designed to reduce walking when starting self-tapping screws as well as reduce overdriving, breaking, and stripping out screws. You may enable and apply it in the ONE-KEY™ app.	Productivity
