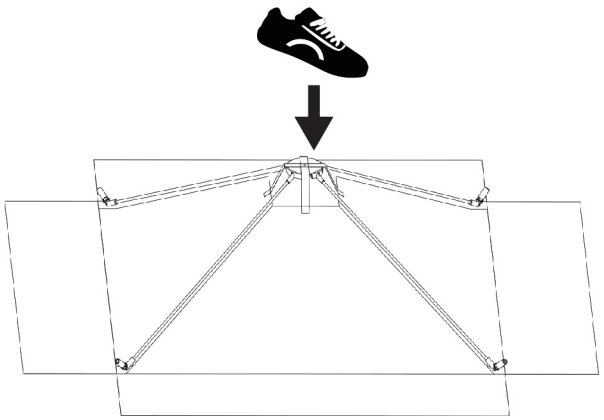
Canopy Instruction Manual

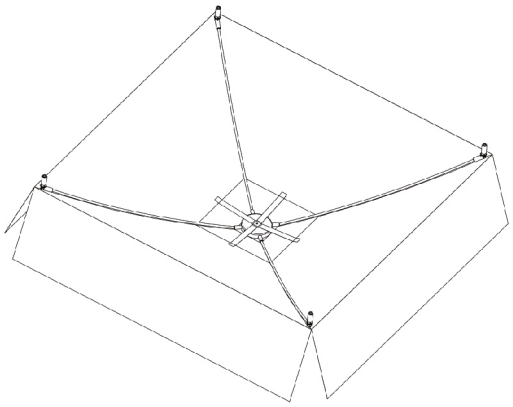
Forming the canopy dome:

Step 1: In an open area, position the canopy so that the inside of the canopy (with canopy supports showing) is facing up.

Step 2: Manually expand the canopy spokes evenly in each direction as much as possible.

Step 3: Using your foot, step on the center hub of the canopy to invert and lock the supports in place. The canopy will 'flip' into its proper convex shape and become stable. (fig.1)





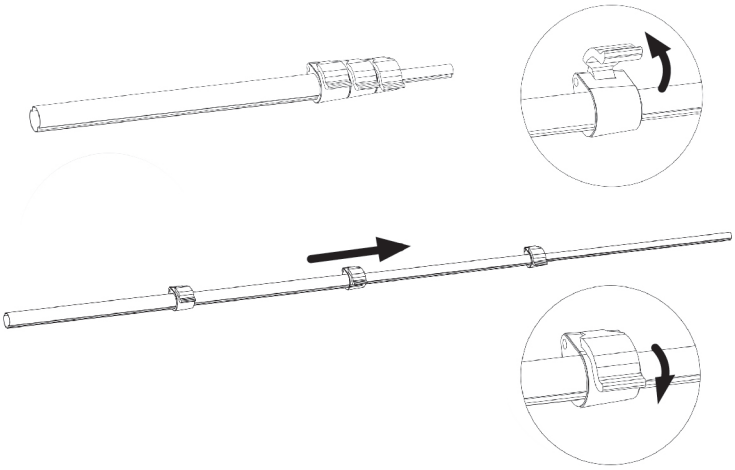
(fig.1)

Installing the telescoping support poles:

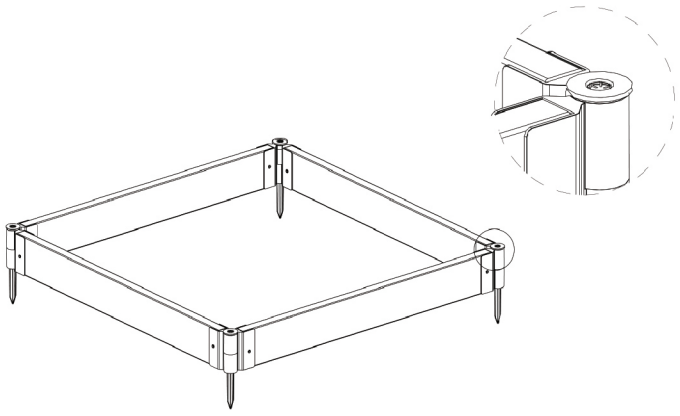
Step 1: Unlock the clamps on each telescoping support pole and extend the pole to its full length. Lock the clamps to hold in place. (fig.2)

Step 2: Remove existing caps from anchor or stacking joints. Replace with adapter caps that have holes to receive the poles. (fig.3)

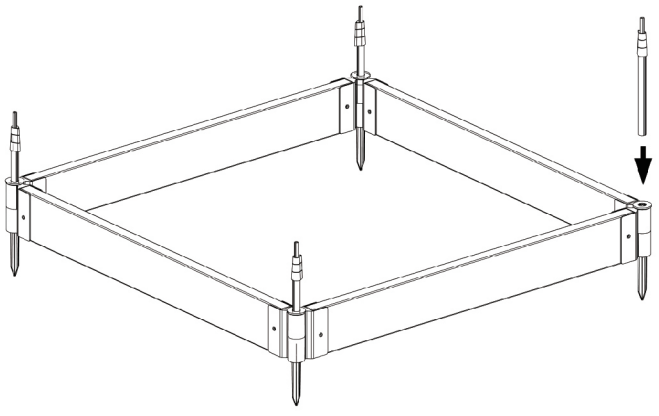
Step 3: Insert widest end of telescoping support pole into recess of stacking joint stake. Repeat with remaining poles. (fig.4)



(fig2)



(fig.3)



(fig.4)

Attaching the canopy:

(Note: This is easiest with two people)

Step 1: Position canopy top so that canopy connectors are aligned with support poles. (fig.5)

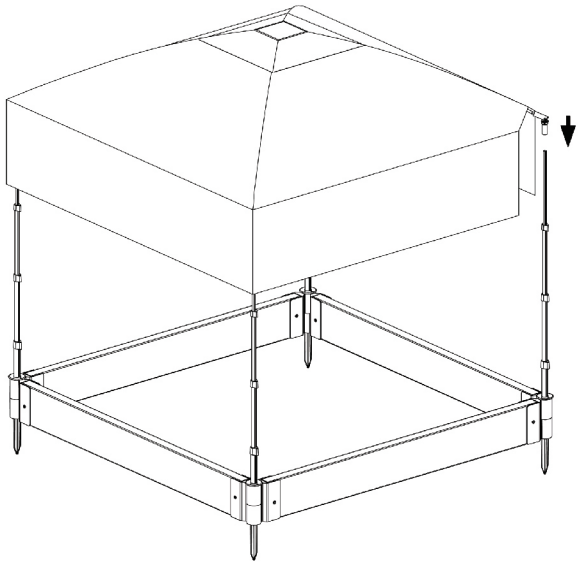
Step 2: Insert support pole into canopy connector cap. Repeat with remaining poles. (fig.5)

Step 3: Pull canopy flaps together at each corner and affix with Velcro tabs.

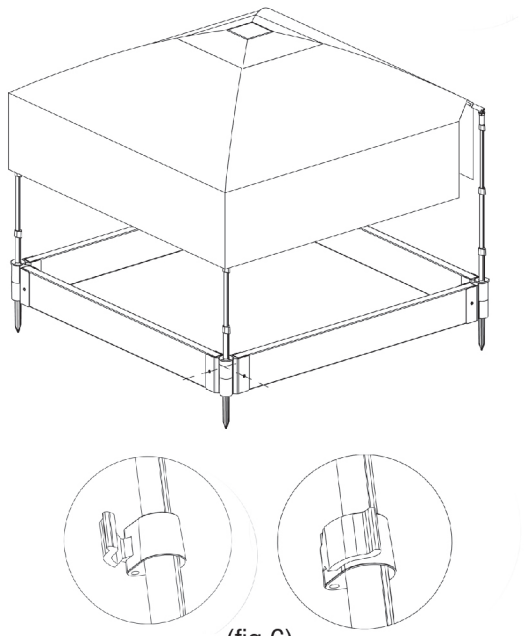
To convert to sandbox cover:

Step 1: Release the highest clamp on each pole. Canopy will now slide down to the next set of levers. Repeat with each additional level of clamps until the poles have fully telescoped into each other. (fig.6)

Step 2: To inhibit animal intruders, secure ties at base of cover.



(fig.5)



(fig.6)

To convert back to canopy:

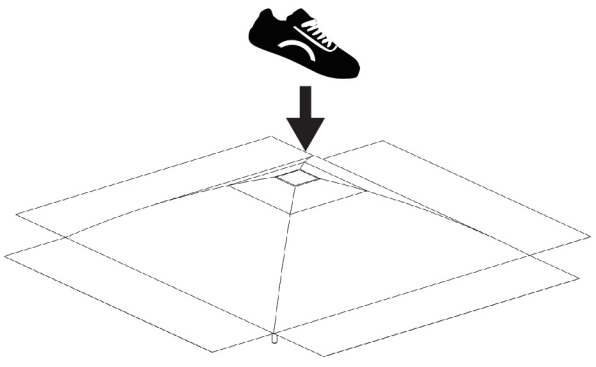
Step 1: Release each bottom set of levers, then extend and lock first level of telescoping poles. Repeat with each additional level.

Storing the canopy:

Step 1: Remove canopy from telescoping poles. Place on ground right side up (as it came off the support poles)

Step 2: Using your foot, step on the central hub to invert and unlock the canopy supports. (fig.7)

Step 3: Compress canopy sides together to close. (fig.8)



(fig.7)
