

Post Top Installation

1. Carefully remove the mounting screw clips and screws from post top. Use a straight edge screwdriver to pry from the inside edge of the clip to remove easily (Fig. 1).
2. Pull plastic battery tab from battery compartment to activate (Fig.1).
3. Secure the post top using mounting screws provided and firmly snap the mounting screw clips back into place (Fig. 2).
4. Allow the post top to receive a minimum of 24 hours of sunlight so the rechargeable battery can reach maximum capacity.
