

## **Remove the cap**

Quarter-turn counterclockwise to remove the cap.

## **Alternative cap removal**

Spout can be used to remove the cap when turned upside down.

## **Attach the Simple Pour Spout**

The Simple Pour Spout threads onto the cap with a clockwise turn. Use plastic wings to properly tighten.

## **Pour the paint into the tray**

Pour paint and slowly bring paint can back up to its upright position to avoid any drips.

## **Remove the spout**

After pouring the paint, turn the spout counterclockwise to remove the spout.

Clean spout to reuse at a later time.

## **Secure cap**

Reseal the cap by turning it clockwise and align the arrows with the window.

## Lid Removal

If needed, entire lid can be removed with a paint key or screwdriver.
