

DIRECTIONS FOR USE: Shake well. **TO RECONDITION DRIED BRUSHES:** 1. Suspend brush in a metal can and fill with Brush Cleaner until bristles are covered up to the metal base of the bristles. Soak brush for several hours, or overnight, until the paint is softened. Occasionally agitate brush to speed the softening. 2. Loosen residue with a brush comb or metal fork, starting at the base of the bristles. Agitate in fresh cleaner to loosen remaining residue and shake out excess cleaner. Wash brush thoroughly with warm soapy water, shake out excess water, and hang brush to dry. **TO CLEAN FRESH PAINT:** For brushes and rollers with wet paint or coatings, agitate in Brush Cleaner immediately. Follow directions in #2 above.

IMPORTANT: Carefully read all cautions and directions before use. Use this product as directed on the label. **HELPFUL TIPS:** Do not use as a thinner for water-based paint, latex coatings, lacquer or shellac. Store brushes by wrapping in heavy paper to preserve original shape and hang bristles down or lay flat. Could cause flaring of natural bristle brushes.
