

*Kap-It is designed for the homeowner and professional alike.*

The professional is able to quickly clean around the top of the sprinkler cap. Unscrew the nozzle and add the stem extender. Slide the cap extender over the stem and snap it down onto the existing cap. Replace the nozzle and align. You can add more than one and use it to unscrew the canister cap.

Life expectancy of KAP-IT is equal to the head it is being attached to. KAP-IT is made to take a beating because there is no change to the original head structure or mechanics thus a minimal possibility of failure. KAP-IT has a one year warranty against manufacturer defects.

*Need to raise a sprinkler head?  
Don't dig it! KAP-IT!*

The KAP-IT riser allows you to raise a sprinkler Quickly! Easily! With NO DIGGING! If your sprinklers aren't too low now, they will be. Simply expose the top of the sprinkler head and unscrew the nozzle, add the stem extender and snap on the new top! After reattaching the nozzle and lining it up, you're done. No tools or dirt in your lines and less stress on any of your below ground fittings. KAP-IT fits on most common heads, and changes none of the original mechanics.

*When your sprinklers too low,  
Don't dig it! KAP-IT!*

Oh, and they are **STACKABLE** for those extra deep heads.

When a sprinkler is not above the grass blade height, even the most advanced water saving nozzles distribute water inefficiently. Blockage of the water stream causes increased water waste and run off. As a standard cure to extend the life of risers that are too low, home owners start lowering the deck height of their mowers. This increases soil temperatures, which increases evaporation, and requires extended water run times.

By making it fast and easy for anyone to raise their sprinkler heads, watering stays efficient, and distribution is maximized.

 **MADE IN AMERICA**

- *Saves Labor, Saves Time*
- *Raise It From The Top*
- *Eliminates Dirt in Your Lines*
- *Fits Most Common Pop-ups*
- *Able to Still Unscrew The Original Canister*
- *Stackable*
