Content

- 1x Solar panel with 100 LED copper wire
- 1 Solar Rechargeable battery included (Inside the light)

During the Day

Put me in the sun! Product wont work at night unless the solar panel is in direct sunlight at least 8 hours a day.

During the Night

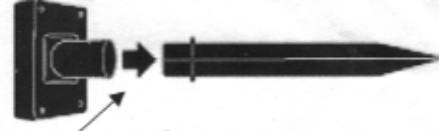

Put me in the dark! Solar panel needs to be in the dark so it knows to turn on the light automatically.

Battery care

- Battery stores the suns energy during the day, and turn on the light at night.
- Only replace with solar rechargeable batteries

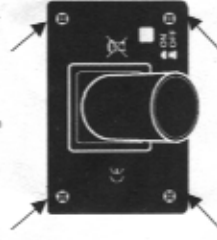

Assembly

- 1) Insert solar panel into the stake
- 2) Find creative place to place copper wire
- 3) Click button down for on and out for off

Replace the Battery

- Remove all 4 screws to access battery box

Note: Stake should not be pressed into hard dirt.
