Your Mattress-in-a-Box Guide

We love the new foam mattress you chose! **Please unpack it as soon as possible.** Since your mattress is compressed, it may require up to 48 hours to fully expand. Note that this could take longer if it's delivered in cold weather.

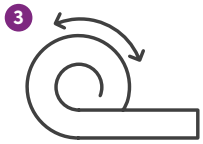

Setup

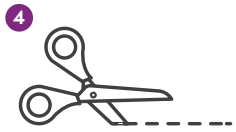

Lay the box on its side and remove the mattress.

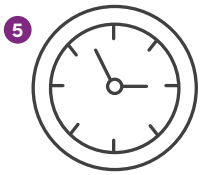

Use scissors to cut and remove the outer plastic sleeve.

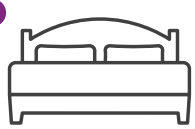

Unroll the mattress and place it on a flat surface.

Cut and remove all remaining plastic packaging.

Let the mattress sit for 48 hours, giving it time to fully expand.

Move your mattress to your bed and enjoy!

Note: Like any new product, your mattress may have a mild scent upon unboxing. The scent is nontoxic and will typically dissipate within 24 hours. To expedite this process, follow these tips:

- Prop it up against a chair or wall to ventilate from all sides for a few hours. If it is a dry day, open the windows.
- Air it out weekly. This can be done when you remove your linens to wash them.

Maintenance

Follow the tips below to prolong the life of your mattress:

1. **Use a mattress protector** to prevent dirt and spills from entering the mattress.
2. **Vacuum weekly** while the linens are being washed.
3. **Rotate the mattress** every three months.
