2. Hazard(s) identification		
Physical hazards	Flammable liquids	Category 4
Health hazards	Specific target organ toxicity, repeated exposure	Category 1 (central nervous system)
	Aspiration hazard	Category 1
OSHA defined hazards	Not classified.	
Label elements		
Signal word	Danger	
Hazard statement	Combustible liquid. May be fatal if swallowed (central nervous system) through prolonged	l and enters airways. Causes damage to organs or repeated exposure.
Precautionary statement		
Prevention	Keep away from flames and hot surfaces No smoking. Do not breathe mist/vapors. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves/protective clothing/eye protection/face protection.	
Response	If swallowed: Immediately call a poison center/doctor. Do NOT induce vomiting. Get medical advice/attention if you feel unwell. In case of fire: Use appropriate media to extinguish.	
Storage	Store in a well-ventilated place. Keep cool. Store locked up.	
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.	
Hazard(s) not otherwise classified (HNOC)	Rags, steel wool, or waste contaminated with this product may spontaneously catch fire if improperly discarded. To avoid a spontaneous combustion fire, immediately after use, place rags, steel wool or waste in a sealed, water-filled, metal container.	
Supplemental information	None.

5. Fire-fighting measures		
Suitable extinguishing media	Water fog. Alcohol resistant foam. Dry chemical powder. Carbon dioxide	e (CO2).
Jnsuitable extinguishing nedia	Do not use water jet as an extinguisher, as this will spread the fire.	
Specific hazards arising from he chemical	The product is combustible, and heating may generate vapors which ma mixtures. During fire, gases hazardous to health may be formed. Rags, contaminated with this product may spontaneously catch fire if improper	steel wool, or waste
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be	worn in case of fire.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers so without risk. Cool containers exposed to heat with water spray and re is involved.	
Specific methods	Use standard firefighting procedures and consider the hazards of other	involved materials.
General fire hazards	Combustible liquid.	
6. Accidental release meas	sures	
Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwing ignition sources (no smoking, flares, sparks, or flames in immediate are protective equipment and clothing during clean-up. Do not breathe mist/ ventilation. Local authorities should be advised if significant spillages ca personal protection, see section 8 of the SDS.	a). Wear appropriate ⁄vapors. Ensure adequa
Methods and materials for containment and cleaning up	Use water spray to reduce vapors or divert vapor cloud drift. Eliminate a smoking, flares, sparks, or flames in immediate area). Keep combustible away from spilled material.	
	Large Spills: Stop the flow of material, if this is without risk. Dike the spil possible. Use a non-combustible material like vermiculite, sand or earth and place into a container for later disposal. Following product recovery	to soak up the product
	Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean remove residual contamination.	surface thoroughly to
Environmental precautions	Never return spills to original containers for re-use. For waste disposal, Avoid discharge into drains, water courses or onto the ground.	see section 13 of the S

7. Handling and storage

Precautions for safe handling

Keep away from open flames, hot surfaces and sources of ignition. Do not breathe mist/vapors. Avoid prolonged or repeated contact with skin. Avoid prolonged exposure. When using, do not eat, drink or smoke. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Observe good industrial hygiene practices. Immediately after use, place rags, steel wool, or waste in a sealed water-filled metal container.

Conditions for safe storage, including any incompatibilities Store locked up. Keep away from heat and sources of ignition. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

propriate engineering trols	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Skin protection Other	Wear appropriate chemical resistant c	lothing. Use of an impervious	anron is recommended

Respiratory protection	If airborne concentrations are above the applicable exposure limits, use NIOSH approved respiratory protection. Chemical respirator with organic vapor cartridge and full facepiece. Use a positive-pressure air-supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air-purifying respirators may not provide adequate protection.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Prolonged skin contact may cause temporary irritation.
Eye contact	Direct contact with eyes may cause temporary irritation.
Ingestion	Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia.
Symptoms related to the physical, chemical and toxicological characteristics	Aspiration may cause pulmonary edema and pneumonitis. Narcosis. Behavioral changes. Decrease in motor functions. Direct contact with eyes may cause temporary irritation.

Information on toxicological effects

12. Ecological information

Ecotoxicity	Toxic to aquatic life with long lasting effects.
Persistence and degradability	No data is available on the degradability of this product.
Bioaccumulative potential	No data available.
Mobility in soil	No data available.
Other adverse effects	The product contains volatile organic compounds which have a photochemical ozone creation potential.

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner.
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
